

BOOK REVIEW**Wayshowing – A Guide to Environmental Signage: Principles and Practices****PER MÖLLERUP (LARS MÖLLER PUBLISHERS, BADEN, SWITZERLAND, 2005)**

Review by Johan Redström, Danish Centre for Design Research

INTRODUCTION

Designing environmental signs that guide people as they try to find their way in an unknown environment is not about designing wayfinding as the literature often seems to suggest, states Möllerup. Rather, it is about designing wayshowing. Wayshowing relates to wayfinding as cooking relates to eating, or writing to reading – what the designer does is not to solve the problem of finding the way; what he/she does is to facilitate people's own problem-solving.

With the central distinction between wayshowing and wayfinding, Möllerup positions himself perhaps not so much in relation to our everyday use of what it means to show and find the way, but to previous work on the subject, perhaps most notably the work on wayfinding and architecture by Arthur and Passini during the 1970s and '80s (cf. Passini, 1984; Arthur & Passini, 1992). That this relation is of some importance here can also, for instance, be seen in that we find other ideas from their line of inquiry in Wayshowing, such as the notion of wayfinding as a "spatial problem solving process" that can be understood as a combination of "planning" and "execution".

In terms of the overall design of the book, a striking feature is the elaborate balance between written and visual content. Though the book certainly can be 'read' like most textbased books, the many illustrations and photographs, often by the author himself, also allow for a more visually driven approach to the content, which leads to some interesting reading experiences. In itself an illustration of some of the ideas presented, Wayshowing is indeed a very beautiful book.

CONTENT OVERVIEW

The structure of the book is based on two sections dealing with "Principles" and "Practices" respectively. In "Principles", Möllerup presents a general framework for wayshowing design including key concepts and basic theories, as well more specific design guidelines and recommendations. In the "Practices" section, the book presents a series of case studies as illustrations of how wayshowing design may work out in practice. Without going into a detailed description, let us consider some of the components of this rich picture of what wayshowing is all about.

As mentioned above, a key premise of this work is that wayfinding can be understood as a spatial problem-solving process composed of elements of planning and execution, or of decision-making and decision execution. To facilitate wayfinding, wayshowing design therefore needs to be based on an understanding of what this process looks like. To this end, Möllerup among other things presents nine strategies that people use to find their way: track following, route following, educated seeking, inference, screening, aiming, map reading, compassing, and social navigation. Important here is that all of these are rational in one way or another, and that they therefore have a certain logic that wayshowing design needs to build on.

For it to be possible for someone to infer the right way to, say, a certain building on the basis of street name and number, there needs to be a comprehensible structure behind them.

Per Mollerup Per Mollerup,2005 Riffing on the techie term wayfinding which designers and manufacturers use when talking about the function of signs and signage systems as they are used by the viewer this book seeks to find a more precise visual language for what sign designers actually do which is to show the way Unfortunately as Mollerup points out many designers never master the art of wayshowing themselves For wayshowing relates to wayfinding as writing relates to reading and as talking relates to hearing The purpose of wayshowing is to facilitate wayfinding In this accessible but invigorating investigation Mollerup examines international sign systems and architectural landmarks in detail with his trademark candor and good humor His analysis is at once pithy scholarly and historical *The Wayfinding Handbook* David Gibson,2009-02-04 Principles of environmental graphic design P 1 of cover **Community Wayfinding: Pathways to Understanding**
