Rosenberg, 2016-10-11 Business and environmental sustainability are not natural bedfellows Business is about making money sustainability is about protecting the planet Business is measured in months and quarters sustainability often requires significant short term costs to secure a sometimes uncertain long term benefit To some activists all executives are exploitative selfish 1 percenters To some executives all activists are irresponsible unyielding extremists And yet engaging with the issue isn't optional all businesses must have a strategy to deal with sustainability and like any strategy this involves making choices Strategy and Sustainability encourages its readers to filter out the noise and make those choices in a hard nosed and clear eyed way Rosenberg's nuanced and fact based point of view recognizes the complexity of the issues at hand and the strategic choices businesses must make He blends the work of some of the leading academic thinkers in the field with practical examples from a variety of business sectors and geographies and offers a framework with which Senior Management might engage with the topic not just to save the planet but to fulfil their short medium and long term responsibilities to shareholders and other stakeholders p
