The Sociolinguistics Of Sign Languages:

The Sociolinguistics of Sign Languages Ceil Lucas, 2001-10-04 This is an accessible introduction to the major areas of sociolinguistics as they relate to sign languages and deaf communities. Clearly organised, it brings together a team of leading experts in sign linguistics to survey the field and covers a wide range of topics including variation, multilingualism, bilingualism, language attitudes, discourse analysis, language policy and planning. The book examines how sign languages are distributed around the world, what occurs when they come in contact with spoken and written languages, and how signers use them in a variety of situations. Each chapter introduces the key issues in each area of inquiry and provides a comprehensive review of the literature. The book also includes suggestions for further reading and helpful exercises. **The Sociolinguistics of Sign Languages** will be welcomed by students in deaf studies, linguistics and interpreter training, as well as spoken language researchers and researchers and teachers of sign language.

Sociolinguistic Variation in American Sign Language Ceil Lucas, Robert Bayley, Clayton Valli, 2001 Linguists Ceil Lucas, Robert Bayley, Clayton Valli and a host of other researchers have taken the techniques used to study the regional variations in speech such as saying 'h' which for which and have applied them to American Sign Language. Storytelling and Conversation Elizabeth A. Winston, 1999 In this intriguing book, renowned sociolinguistics experts explore the importance of discourse analysis, a process that examines patterns of language to understand how users build cooperative understanding in dialogues. It presents discourse analyses of sign languages native to Bali, Italy, England and the United States. Studies of internal context review the use of space in ASL to discuss space: how space in BSL is used to package complex narrative tasks; how signers choose linguistic tools to structure storytelling; and how affect, emphasis and comment are added in text, telephone conversations. Inquiries into external contexts observe the integration of deaf people and sign language into language communities in Bali and the language mixing that occurs between deaf parents and their hearing children. Both external and internal contexts are viewed together, first in an examination of applying internal ASL text styles to teaching written English to Deaf students and then in a consideration of the language choices of interpreters who must shift footing to manage the interpreter's paradox. **Storytelling and Conversation** casts new light on discourse analysis, which will make it a welcome addition to the sociolinguistics canon.
