Metabolic reprogramming in cancer Valentina Audrito ,Elisa Giovannetti,2025-03-24 Technological advancements over the past few decades have unraveled the diversity and adaptability of tumors shedding light on key genetic aberrations and metabolic pathways that support tumor growth Specifically cancer cells alter their metabolic pathways to fulfill the augmented energy and building block requirements while managing oxidative stress crucial for their proliferation and survival The flux through these metabolic pathways underlying of cancer metabolic plasticity is controlled by cancer driver mutations and environmental nutrient availability The tumor microenvironment TME often deficient in specific nutrients compels cancer cells to adapt by inducing mechanisms to scavenge nutrients and sustain their proliferation Moreover it is increasingly recognized that the metabolism of non cancerous cell types within the TME such as endothelial cells fibroblasts and immune cells can influence tumor progression Specifically metabolic reprogramming is also essential for maintaining self and body homeostasis of various types of immune cells Recent studies have highlighted that immune cells undergo metabolic reprogramming during proliferation differentiation and execution of effector functions which are crucial for regulating the antitumor immune response This impact is achieved by the release of metabolites and its effects on the expression of immune molecules such as PGE2 and lactate Considering that metastases are a significant cause of cancer related deaths ongoing efforts focus on comprehending how metabolism is employed by metastatic cells Furthermore there is a newfound interest in utilizing cancer genetic analysis to stratify patients and design dietary interventions along with metabolism targeting therapies

Muscle-Tendon-Innervation Unit: Degeneration and Aging - Pathophysiological and Regeneration

Mechanisms Luciano Merlini, Cesare Faldini, Paolo Bonaldo, 2017-02-24 Aging is characterized by progressive deterioration of walking ability. This function loss has multiple causes including central and peripheral nerve dysfunction, loss of muscle mass and strength as well as joints and bone alterations. Muscle tendon unit and its innervation has a pivotal role in motor function performance that can be disrupted by overuse, degeneration and aging. Research has shown that overuse, degeneration and aging also share some pathophysiological mechanisms including mitochondrial dysfunction, increased apoptosis, abnormal modulation of autophagy, decline in satellite cells, increased generation of reactive oxygen species and modification of signalling and stress response pathways. This Research Topic is intended to bring together basic researchers and clinicians working in the area of neuroscience, aging, sarcopenia and orthopaedics in human and in animal models. The aim of this cross fertilization is to accelerate our understanding of the mechanisms involved in aging and degeneration of the muscle tendon unit and its innervation and to explore the therapeutic potential of pharmacological and physical therapy interventions.

SONG OF ACHILLES MADELINE. MILLER, *Een lied voor Achilles* Madeline Miller, 2012-10-04 Madeline Miller heeft op bewonderingswaardige wijze de klassieker Ilias opnieuw vormgegeven in een eigentijdse spannende roman waarvoor ze de Orange Prize 2012 heeft gekregen. Patroclus is een jonge prins verbannen naar het koninkrijk van Phthia om daar op te groeien met godenzoon Achilles. Achilles is sterk, mooi, een gouden kind, alles wat Patroclus niet is. Maar ondanks hun verschillen raken de jongens innig bevriend en hun band wordt sterker naarmate ze ouder worden. Dit tot verdriet en woede van Achilles' moeder Thetis, een wrede zeegodin die een hekel heeft aan stervelingen. Als duidelijk wordt dat Helena van Sparta is ontvoerd en alle Griekse mannen verplicht zijn om haar eer te wreken en Troje te belegeren, sluit Achilles zich aan bij het leger, verblind door de belofte van roem. Patroclus verscheurd door liefde voor en angst om zijn vriend gaat met hem mee. Zij weten niet dat het lot hen tot het uiterste zal testen en hun zal vragen om een verschrikkelijk offer.

Cancer Research, 2007-04 *The Song of Troy* Colleen McCullough, 2010 Fantasy fiction The tragic and terrible drama of the war between Greeks and Trojans, the long siege of Troy and the impact of one woman's beauty on the fate of two nations is played out again in this dazzling novel based on Homer's Iliad. Meet enchanting Helen who we first encounter as a spoiled teenager and whose passion for the handsome, reckless Paris leads to the betrayal of her husband King Menelaus and the fall of the House of Troy. Powerful King Agamemnon with his terrifyingly ambitious wife Klytemnestra and his soothsaying mistress Cassandra. Odysseus, doomed to wander the Aegean for twenty long years, brave Achilles who is haunted by the mad shade of his mother, the heroes Hector and Ajax and many more.

She saw how Thetis attempted to immortalize him by burning his mortality over a pyre and how Peleus' interruption caused Achilles to have a mortal flaw. She witnessed the moment when

Achilles realized that he had to die on the battlefields of Troy The shadow of imperfection loomed over all of his horizons but Marianna attempts to fully immortalize him by building a flawless palace Marianna causes Achilles to enter the modern world but she realizes that a flaw in the palace implies that Achilles will once again have a short time to live **Ahilov pev**
