Witches Westerners And Hiv Aids And Cultures Of Blame In Africa:

WITCHES, WESTERNERS, AND HIV Alexander Rödlach, 2006-10-15 A witch's curse an imperialist conspiracy a racist plot Alexander Rödlach draws on a decade of research and work in Zimbabwe to compare local beliefs about the cause of the HIV/AIDS epidemic in Africa and the impact of these beliefs on public health and advocacy programs Witches, Westerners, and HIV Alexander Rödlach, 2016-09-17 A witch's curse an imperialist conspiracy a racist plot HIV/AIDS is a catastrophic health crisis with complex cultural dimensions From small villages to the international system explanations of where it comes from who gets it and who dies are tied to political agendas religious beliefs and the psychology of devastating grief Frequently these explanations conflict with science and clash with prevention and treatment programs In *Witches Westerners and HIV* Alexander Rödlach draws on a decade of research and work in Zimbabwe to compare beliefs about witchcraft and conspiracy theories surrounding HIV/AIDS in Africa He shows how both types of beliefs are part of a process of blaming others for AIDS a process that occurs around the globe but takes on local culturally specific forms He also demonstrates the impact of these beliefs on public health and advocacy programs arguing that cultural misunderstandings contribute to the failure of many well intentioned efforts This insightful book provides a cultural perspective essential for everyone interested in AIDS and cross cultural health issues *HIV/AIDS and the Social Consequences of Untamed Biomedicine* Graham Fordham, 2014-11-13 Drawing on the case of HIV/AIDS in Thailand this book examines how anthropological and other interpretative social science research has been utilized in modeling the AIDS epidemic and in the design and implementation of interventions It argues that much social science research has been complicit with the forces that generated the epidemic and with the social control agendas of the state and that as such it has increased the weight of structural violence bearing upon the afflicted The book also questions claims of Thai AIDS control success arguing that these can only be made at the cost of excluding categories such as intravenous drug users the incarcerated and homosexuals who continue to experience extraordinarily high levels of levels of HIV infection Considered deviant and undeserving these persons have deliberately been excluded from harm reduction programs Overall this work argues for the untapped potential of anthropological research in the health field a confident anthropology rooted in ethnography and a critical reflexivity Crucially it argues that in context of interdisciplinary collaborations anthropological research must refuse relegation to the status of an adjunct discipline and must be free epistemologically and methodologically from the universalizing assumptions and practices of biomedicine The Politics of AIDS Denialism Pieter Fourie, Melissa Meyer, 2016-03-03 Successive South African governments have had controversial views on HIV and AIDS which have led to allegations that South Africa is in a state of denial about the AIDS epidemic This book attempts to determine the validity of such claims of government denial by formulating and testing a denial hypothesis The hypothesis is contextualized with an overview of the South African epidemic as well as a review of allegations of government denial It reveals possible political factors that may motivate policy makers to

resort to official denial and tentatively concludes with a confirmation of the allegations contained in the denial hypothesis. However this is done within the broader notion that denial is inherently vague and couched in language rarely in writing and therefore difficult to test with certainty and as such this book's real value lies in the insights gained into the complex politics of denial. By exploring the dynamics of denial and denialism and applying this to the South African AIDS epidemic this study provides a comprehensive analysis. The Politics of AIDS Denialism Melissa Meyer, Professor Pieter Fourie, 2013-03-28

Different Modernities Patrick Brown, 2018-12-07 Setting out to challenge various common assumptions in risk research this collection explores how uncertainty is handled in a range of social contexts across the globe. Social science research often emphasises the salience of risk and uncertainty for grasping the dynamics of late modern societies with theoretical frameworks tending to associate the emergence of risk with particular fairly homogenous European or North Western paths of modernisation. These theoretical narratives can be seen as shaping various assumptions regarding risk cultures not least associations with post traditional largely secular and liberal characteristics. Risk is therefore analysed in terms of modern active rational citizens meanwhile faith hope or magic are implicitly relegated to the past the oriental the passive and or the irrational. Central to the book is the consideration of risk across a range of different modernities. While the precise meaning and organisational processes of risk vary we see the common combining of risk faith magic and hope as people go forward amid uncertain circumstances. Whether seeking health amid illness survival amid flooding or safety amid migration we explore the pertinence of risk around the globe. We also stress the ubiquity of faith and the magical in various modern settings. This book was originally published as a special issue of *Health Risk Society*. *Morality, Hope and Grief* Hansjörg Dilger, Ute Luig, 2010-05-01 The HIV AIDS epidemic in sub Saharan Africa has been addressed and perceived predominantly through the broad perspectives of social and economic theories as well as public health and development discourses. This volume however focuses on the micro politics of illness treatment and death in order to offer innovative insights into the complex processes that shape individual and community responses to AIDS. The contributions describe the dilemmas that

families communities and health professionals face and shed new light on the transformation of social and moral orders in African societies which have been increasingly marginalised in the context of global modernity Folklore, Gender, and AIDS in Malawi A. Wilson, 2013-11-07 Informal folk narrative genres such as gossip advice rumor and urban legends provide a unique lens through which to discern popular formations of gender conflict and AIDS beliefs This is the first book on AIDS and gender in Africa to draw primarily on such narratives By exploring tales of love medicine gossip about romantic rivalries rumors of mysterious new diseases marital advice and stories of rape among others it provides rich personally grounded insights into the everyday struggles of people living in an era marked by social upheaval **Fierce Medicines, Fragile Socialities** Dominik Mattes, 2019-08-01 Set in Tanga a city on the Tanzanian Swahili coast Dominik Mattes examines the implementation of antiretroviral HIV treatment ART in the area exploring the manifold infrastructural and social fragilities of treatment provision in public HIV clinics as well as patients multi layered struggles of coming to terms with ART in their everyday lives Based on extensive ethnographic fieldwork the book shows that notwithstanding the massive rollout of ART providing treatment and living a life with HIV in settings like Tanga continue to entail social economic and moral challenges and long term uncertainties which contradict the global rhetoric of the normalization of HIV **A Companion to Medical Anthropology** Merrill Singer, Pamela I. Erickson, 2011-05-02 A Companion to Medical Anthropology examines the current issues controversies and state of the field in medical anthropology today Provides an expert view of the major topics and themes to concern the discipline since its founding in the 1960s Written by leading international scholars in medical anthropology Covers environmental health global health biotechnology syndemics nutrition substance abuse infectious disease and sexuality and reproductive health and other topics
