The Sources of Modern Architecture and Design Sir Nikolaus Pevsner, 1968 **History of Art** Horst Woldemar Janson, Anthony F. Janson, 2004 For forty years this widely acclaimed classic has remained unsurpassed as an introduction to art in the Western world boasting the matchless credibility of the Janson name This newest update features a more contemporary more colorful design and vast array of extraordinarily produced illustrations that have become the Janson hallmark A narrative voice makes this book a truly enjoyable read and carefully reviewed and revised updates to this edition offer the utmost clarity in contributions based on recent scholarship Extensive captions for the book s incredible art program offer profound insight

through the eyes of twentieth century art historians speaking about specific pieces of art featured throughout. Significantly changed in this edition is the chapter on The Late Renaissance in which Janson offers a new perspective on the subject tracing in detail the religious art tied to the Catholic Reform movement whose early history is little known to many readers of art history. Janson has also rearranged early Renaissance art according to genres instead of time sequence and he has followed the reinterpretation of Etruscan art begun in recent years by German and English art historians. With a truly humanist approach this book gives written and visual meaning to the captivating story of what artists have tried to express and why for more than 30 000 years.

Illustration: A Concise History Andrew Hall, 2025-03-06. *Illustration: A Concise History* is a dynamic visual journey through the landscape of illustration that maps the evolution of the discipline from the industrial revolution to the post digital age and showcases over 180 of its most iconic practitioners including Laura Knight, Antonio Lopez K, the Kollwitz and Hayao Miyazaki. By contextualizing the subject within a framework of key political events, cultural innovations and technological advances, Andrew Hall redefines how we might think about illustration and the place that it has in our ever evolving global network. The second half of this introductory volume follows on from the ten chapters charting the chronology of illustration to provide a more in depth look at its specific commercial genres across eleven feature sections, each including mini histories, practical career advice and biographies of inspirational practitioners who operated within the field.

Modern Architecture in Mexico City Kathryn E. O'Rourke, 2017-02-10

Mexico City became one of the centers of architectural modernism in the Americas in the first half of the twentieth century. Invigorated by insights drawn from the first published histories of Mexican colonial architecture, which suggested that Mexico possessed a distinctive architecture and culture beginning in the 1920s, a new generation of architects created profoundly visual modern buildings intended to convey Mexico's unique cultural character. By midcentury, these architects and their students had rewritten the country's architectural history and transformed the capital into a metropolis where new buildings that evoked pre-conquest colonial and International Style architecture coexisted. Through an exploration of schools, a university campus, a government ministry, a workers' park, and houses for Diego Rivera and Luis Barragán, Kathryn O'Rourke offers a new interpretation of modern architecture in the Mexican capital, showing close links between design, evolving understandings of national architectural history, folk art, and social reform. This book demonstrates why creating a distinctively Mexican architecture captivated architects whose work was formally dissimilar and how that concern became central to the profession.
