Backpacker ,2000-05 Backpacker brings the outdoors straight to the reader s doorstep inspiring and enabling them to go more places and enjoy nature more often The authority on active adventure Backpacker is the world s first GPS enabled magazine and the only magazine whose editors personally test the hiking trails camping gear and survival tips they publish Backpacker s Editors Choice Awards an industry honor recognizing design feature and product innovation has become the gold standard against which all other outdoor industry awards are measured **History of Technology** Alfred Rupert Hall,Norman Smith,1982 Technical standards have received increasing attention in recent years from historians of science and technology management theorists and economists Often inquiry focuses on the emergence of stability technical closure and culturally uniform modernity Yet current literature also emphasizes the durability of localism heterogeneity and user choice This collection investigates the apparent tension between these trends using case studies from across the nineteenth and twentieth centuries The History of Technology addresses tensions between material standards and process standards explores the distinction between specifying standards and achieving convergence towards them and examines some of the discontents generated by the reach of standards into everyday life Bloomsbury Publishing **The Rise and Fall of American Technology** Lynn G. Gref,2010-01-01 He contrasts the commonly held perception that the pace of technology is accelerating with the historical record He highlights the people and the organizations which are responsible for America s technological largesse The book follows the money to uncover the underlying trends The beginning of a decline in technology development is detected using indirect indicators for clues Impacts on the formation of companies employment and productivity provide sobering reasons to enlighten others and demand a change in course After considering the possibilities the book proposes several constructive actions which avoid the proverbial tendency to throw more money at the problem The goal of the book is to provoke discussion and promote action where appropriate Americans standard of living is at stake Tech savvy readers will want to understand this issue so as to influence others Long range thinkers will want to factor these considerations into their prognostications The titans of the technology based companies can develop new and improved strategies based on the findings of this book And our elected officials may want to act before a catastrophic disaster confronts the nation This book will strike a chord with everyone who is interested in America s future economic health Specific audience groups include scientists engineers entrepreneurs employees in technology based companies government

and corporate policymakers deciding the future of research and development R D programs government workers involved in the execution of government R D programs and those thinking about a career in R D It is complementary to such works as Politics and Economics in America The Way We Came to Be by Richard E Carmichael Krieger Publishing Company 1998 which explores political and economic history in order to explain the emergence of the United States world economic dominance Carmichael s book makes recommendations on how government could assist America s businesses in maintaining our economic leadership but it does not address any aspects of technology development and associated issues Closing the Innovation Gap by Judy Estrin McGraw Hill 2009 provides business leaders with concepts for leading their organizations so as to close the innovation gap with competitors It focuses on the innovation environment within the organization whereas Dr Gref addresses the complete technology development cycle its financing America s rise to global dominance and the specter of a national decline
