The Taste of Conquest Michael Krondl,2008-10-28 The smell of sweet cinnamon on your morning oatmeal the gentle heat of gingerbread the sharp piquant bite from your everyday peppermill The tales these spices could tell of lavish Renaissance banquets perfumed with cloves and flimsy sailing ships sent around the world to secure a scented prize of cinnamon dusted custard tarts and nutmeg induced genocide of pungent elixirs and the quest for the pepper groves of paradise The Taste of Conquest offers up a riveting globe trotting tale of unquenchable desire fanatical religion raw greed fickle fashion and mouthwatering cuisine in short the very stuff of which our world is made In this engaging enlightening and anecdote filled history Michael Krondl a noted chef turned writer and food historian tells the story of three legendary cities Venice Lisbon and Amsterdam and how their single minded pursuit of spice helped to make and remake the Western diet and set in motion the first great wave of globalization In the sixteenth and seventeenth centuries the world s peoples were irrevocably brought together as a result of the spice trade Before the great voyages of discovery Venice controlled the business in Eastern seasonings and thereby became medieval Europe s most cosmopolitan urban center Driven to dominate this trade Portugal s mariners pioneered sea routes to the New World and around the Cape of Good Hope to India to unseat Venice as Europe s chief pepper dealer Then in the 1600s the savvy businessmen of Amsterdam invented the modern corporation the Dutch East India Company and took over as spice merchants to the world Sharing meals and stories with Indian pepper planters Portuguese sailors and Venetian foodies Krondl takes every opportunity to explore the world of long ago and sample its many flavors The spice trade and its cultural exchanges didn t merely lend kick to the traditional Venetian cookies called peverini or add flavor to Portuguese sausages of every description or even make the Indonesian rice table more popular than Chinese takeout in trendy Amsterdam No the taste for spice of a few wealthy Europeans led to great crusades astonishing feats of bravery and even wholesale slaughter As stimulating as it is pleasurable and filled with surprising insights The Taste of Conquest offers a fascinating perspective on how in search of a tastier dish the world has been transformed

Obese Humans and Rats (Psychology Revivals) Stanley Schacter,Judith Rodin,2014-10-14 Originally published in 1974 this volume examines the behavioural similarities of obese humans and animals whose so called feeding centre the ventro medial hypothalamic nuclei has been lesioned Both the obese human and the VMH lesioned animal seem to share a hyposensitivity to the internal physiological cues to eating and hypersensitivity to external cues associated with food Beginning with a review these obese animals and the human obese are compared point by

point on experimental results reported in the literature Then new findings are presented that specifically tested humans for relationships that are well established for lesioned animals Next a theoretical framework integrates the human and animal data to postulate that the relationship of cue prominence and probability of response is stronger for the obese than for normal The causes for this and the extension of the basis for the obese's eating behaviour to other areas are discussed in light of further experiments that will make this invaluable reading for all concerned with the history of obesity and the issues of regulatory behaviour
