This book offers a new model for measuring the success and impact of counterterrorism strategies using four comparative
historical case studies The effectiveness of counterterrorism measures is hard to assess especially since the social impact of
terrorist attacks is a fundamental and complex issue This book focuses on the impact of counterterrorist measures by
introducing the concept of the performative power of counterterrorism the extent to which governments mobilize public and
political support thereby sometimes even unwittingly assisting terrorists in creating social drama The concept is applied to
counterterrorism in the Netherlands Italy the Federal Republic of Germany and the United States in the 1970s Based on in
depth case study research using new primary sources and interviews with counterterrorist officials and radicals a correlation
is established between a low level of performative power and a decline of terrorist incidents This is explored in terms of the
link between social drama as enhanced by counterterrorist measures and ongoing radicalization processes This book
demonstrates that an increase in visible and intrusive counterterrorist measures does not automatically lead to a more
effective form of counterterrorism In the open democracies of the west not transforming counterterrorism into a performance
of power and repression is at least as important as counterterrorism measures themselves This book will be of much interest
to students of terrorism and counter terrorism discourse analysis media and communication studies conflict studies and IR
