The Xi Jinping Era His Comprehensive Strategy Towards The China Dream:

The Xi Jinping Era James C. Hsiung, Hong Liu, Ying Chen, Xingwang Zhou, . Huoshen Tan, 2015 China's development has entered a new phase since the era of Mao and Deng Xiaoping. Its GDP has grown to more than 10 trillion US dollars, twice that of Japan's and close to that of the United States, and Chinese diplomacy has taken on a more active profile as the nation moves towards superpower status on the world stage. At the same time, all of this has resulted in serious ecological problems, and as the economy develops, social contradictions are growing more prominent within the country. Xi Jinping, who became General Secretary of the Chinese Communist Party in 2012, has developed a new philosophy of governance to confront these challenges. The result is a 30-year plan that is the roadmap to The China Dream, which has led to various programs such as the ongoing campaigns to address and eliminate corruption within the CCP and reform of the Military, Market reforms, and the Belt and Road Initiatives meant to improve domestic infrastructure and broaden Chinese economic influence on the world stage, and the evolution of a new approach to foreign relations. In addition to an analysis by leading Chinese thinkers of the elements of this plan and its implementation, an overview of Xi's early career and the first two years of his leadership provide readers a look at his thinking and how it has developed, and provides a preview of what we might expect from China in the Xi Jinping Era.

On Xi Jinping Kevin Rudd, 2024-09-17 In *On Xi Jinping*, former Australian Prime Minister Kevin Rudd provides an authoritative account of the worldview driving Chinese behavior on the world stage. Focusing on domestic policy, political economy, and foreign policy, Rudd argues that President Xi Jinping's worldview differs significantly from those of the leaders who preceded him and highlights how the shift has impacted policy. A powerful analysis of the worldview of arguably the most consequential world leader of our era, this will be essential reading for anyone interested in how Xi is transforming both China and the international order.

South China Sea Disputes And The US-China Contest, The: International Law And Geopolitics James Chieh Hsiung, 2018-05-28 This book focuses on a region that, next to the Middle East, has become a dragnet of international conflicts in the world. The South China Sea (SCS) region furthermore is the subject over which a rumored war may break out between the United States, the extant superpower, and China, an emergent superpower. Should the current power transition end up in a Thucydides Trap? The volatility of the situation has gone beyond the long simmering tensions due to overlapping claims by six contending Asian neighbors to culminate in a nascent crisis surrounding the US-China contest. The book's broad sweep provides a careful examination of two tangles: i) a legal tangle bedeviling China's relations with other competing claimant nations, and ii) a geopolitical tangle at the heart of the US-China contest arising from America's instinctual response to the China threat scare trumpeted by neorealist analysts and media gurus, as well. The book reviews what general international law has to say on historic waters, which is the basis of China's claim in its disputes with its contending neighbors. It also examines the background of the China threat scare to see if it has any merit in light of both the shifts in the running China debate and the evidence of China's might and intentions. The book's final part explores a

possible way out of the two tangles in the interest of arriving at a reconciliation of the tensions and conflicts associated with the SCS so that the United States and China can meet each other across the divide for the sake of a new era of public order presumably under a condominium they can build together

Accidental Conflict Stephen Roach, 2022-11-08 The misguided forces driving conflict escalation between America and China and the path to a new relationship A timely fluid readable assessment of a testy and rapidly changing global relationship Kirkus Reviews starred review In the short span of four years America and China have entered a trade war a tech war and a new Cold War This conflict between the world's two most powerful nations wouldn't have happened were it not for an unnecessary clash of false narratives America falsely blames its trade and technology threats on China yet overlooks its shaky saving foundation China falsely blames its growth challenges on America's alleged containment of market based socialism ignoring its failed economic rebalancing In a hard hitting analysis of both nations economies politics and policies Stephen Roach argues that much of the rhetoric on both sides is dangerously misguided amplified by information distortion and more a reflection of each nation's fears and vulnerabilities than a credible assessment of the risks they face Outlining the disastrous toll of conflict escalation between China and America Roach offers a new road map to restoring a mutually advantageous relationship

Chinese Investment in Africa David N. Abdulai, 2016-11-03 China leads the world when it comes to investment and influence on the African continent The extent of Chinese investment in Africa is well known and much has been written about China's foray into Africa However most of the available material has approached this issue by looking at China as the New Colonialist more interested in Africa's vast natural resources than working in partnership for sustained development Whilst China's interest in Africa's resources is evident it is just half of the story China's foray into Africa goes beyond its appetite for natural resources and into the realm of geo politics and international political economics For example China is all too aware of how it can cultivate Africa's support on global issues at the United Nations and at other international fora Breaking free from the binary arguments and analysis which characterize this topic Professor Abdulai presents a refreshing perspective that China's foray into Africa can produce win win outcomes for China and Africa if Africans really know what they want from China Hitherto each African country has tended to engage China with an individual bucket list acting in isolation and not as part of a wider continent indeed Africa and the African Union does not yet have a coordinated policy towards China For Africa to be able to do that it needs to know where China is coming from the factors that contributed to its awakening and success and the benefits and possible pitfalls of this foray in order to better position itself for a win win engagement with China This book will be a valuable read for policy makers think tanks and students of Africa China studies programmes alike

China's Grand Strategy Under Xi Jinping Niv Horesh, 2020-11-29 This book attempts to identify change and continuity in PRC grand strategy and the extent to which Chinese imperial history complicates PRC global outreach in the Xi Jinping era Empires convey the wish to make the world a better place even in the midst of oppression and are eschatological in their rhetoric However empires that last longer have been more pragmatic in their grand strategy sometimes appropriating the aura of past golden ages and at other times learning from the mistakes of their predecessors To date Chinese strategic thinkers are preoccupied with learning lessons from the disintegration of the USSR and fascinated by the secrets of American power Interdisciplinary in its reach analysing grand strategy through both rhetoric and praxis this book unpacks

communist ideology in the post Mao era with an emphasis on the implications for China's economic and security relations with other countries. He particularly focusses on China's approach to South Asia and the Indian Ocean Region, key elements of China's strategy. Xi Jinping: China's Third New Era Jayadeva Ranade, 2022-12-15. As its title, Xi Jinping China's Third New Era suggests, the book covers the period from mid-June 2017 till the end of 2020, a period when Xi Jinping's acolytes claim China had already embarked on a third thirty-year era under his leadership, like those of Mao and Deng before him. This period also saw an outpouring of criticism against the Chinese Communist Party (CCP) and the Chinese President not witnessed since the Tiananmen Square events in 1989. The resentment was sparked by Xi Jinping abolishing tenure limits that govern the cadres' terms in office, as well as the mishandling of the initial stages of the Covid pandemic. It is also the period when Xi Jinping began using the country's security apparatus to further consolidate his position and impose progressively restrictive controls on society. He followed through on his slogan: party government, military, civilian and academic, east, west, south, north and centre: the Party leads everything. The essays explore the modernisation of the People's Liberation Army (PLA), Xi Jinping tightening his grip on members of the Politburo and the higher echelons of the Party, China's policy on Tibet and Beijing's efforts to negate the Dalai Lama's influence inside China, as well as abroad. China's attitude and posture towards India, which have undergone definite change since Xi Jinping adopted an aggressive foreign policy to achieve the rejuvenation of the Chinese nation, have been covered at length. This includes the ongoing incursions along the Line of Actual Control (LAC) in Ladakh since May 2020. China Entering the Xi Jinping Era Zheng Yongnian, Lance Gore, 2014. How will China develop under the new leadership of Xi Jinping and Li Keqiang? This is a key question for both China and the wider world. This book presents a comprehensive overview of the key areas and issues within China, assessing how things are likely to develop under the new leadership. It considers the economy, trade, politics, demographics, appraises the leadership both at the national and provincial levels, and discusses potential flashpoints in China's relationship with its neighbours. The book emphasises the great uncertainty surrounding the next phase of China's development, highlighting the deep social cleavages which exist over issues such as income disparity, rampant corruption, and unequal opportunities in social mobility, and arguing that the political purge of Bo Xilai in the period leading up to the most recent party congress has not been resolved, with many of the policies, practices, and rhetoric of the discredited Bo Xilai model continuing to exert a strong influence.

Xi Jinping on the Global Stage Robert D. Blackwill, Kurt M. Campbell, 2016-02-01. In light of China's deepening economic slowdown, China's foreign policy may well be driven increasingly by the risk of domestic political instability, write Robert D. Blackwill, Henry A. Kissinger senior fellow at the Council on Foreign Relations (CFR) and Kurt M. Campbell, the Asia Group's chairman and chief executive officer in a new Council Special Report. Economic growth and nationalism have for decades been the two founts of legitimacy

for the Communist Party and as the former wanes Chinese leader Xi Jinping will likely rely increasingly on the latter Xi's dominance of the decision making process has made him a powerful but potentially exposed leader the authors note To protect his position Xi will most probably stimulate and intensify Chinese nationalism long a pillar of the state's legitimacy to compensate for the political harm of a slower economy to distract the public to halt rivals who might use nationalist criticisms against him and to burnish his own image The report Xi Jinping on the Global Stage Chinese Foreign Policy Under a Powerful but Exposed Leader notes that China's economy which had expanded at an annual rate of 10 percent for three decades is entering a new era of considerably slower growth To strengthen his position at home Xi will probably intensify his personality cult crack down even harder on dissent and grow bolder in using the anticorruption campaign against elites who oppose him Internationally Xi may provoke disputes with neighbors use increasingly strident rhetoric in defense of China's national interests and take a tougher line in relations with the United States and its allies to shift public focus away from economic troubles To deal with Xi's more assertive foreign and defense policies the authors call for a new American grand strategy for Asia that seeks to avoid a U S China confrontation and maintain U S primacy in Asia The authors both former senior government officials with extensive experience in the region recommend passing the Trans Pacific Partnership an Asia centered trade deal with countries that represent approximately 40 percent of the global economy lifting constraints on U S exports of oil to Asian allies and maintaining a commitment to deploy at least 60 percent of the U S Navy and Air Force in the Asia Pacific They identify the U S pivot or rebalance to Asia as the indispensable ingredient in a successful U S policy to participate and project strength more consequentially in the region and to deal with Chinese power and influence under Xi Jinping
