Designing Accessible Technology P. John Clarkson, P. Langdon, P. Robinson, 2006-08-02 Rapid and unprecedented population ageing poses a serious social and economic challenge across the developed world Shifts in dependency ratios point to escalating welfare and pensions costs which require radical and imaginative responses from Government and industry Key to this is a healthy population able and willing to work longer before retirement and who can be independent for as long as possible afterwards as well as bringing disabled people into mainstream life and employment This book was stimulated by the 3rd CWUAAT workshop the CWUAAT workshops have a general focus on product and solution development It was held in Cambridge UK in April 2006 Contributions from leading researchers focused on design issues for a more inclusive world enabling computer access and the development of new technologies assistive technology and rehabilitation robotics and understanding users and involving them in design

Design for Inclusivity Roger Coleman, John Clarkson, Julia Cassim, 2016-04-08 Inclusive design not only ensures that products services interfaces and environments are easier to use for those with special needs or limitations but in doing so also makes them better for everyone Design for Inclusivity written by a team that has pioneered inclusive design practice internationally reviews the recent social trends and pressures that have pushed this subject to the fore and assesses design responses to date in an international context The authors make the business case for inclusive design and explain the formalisation of the approach in standards and legislation The text includes case studies which describe transport product development IT and service projects as well as industry university collaborative projects and highlights lessons that have been learned This is very much a practical book It offers tools techniques guidelines and signposts for the reader to key resources as well as including advice on research methods and working with users and industry partners
