on intelligence analysis written by intelligence expert Dr Stephen Marrin argues that scholarship can play a valuable role in improving intelligence analysis Improving intelligence analysis requires bridging the gap between scholarship and practice Compared to the more established academic disciplines of political science and international relations intelligence studies scholarship is generally quite relevant to practice Yet a substantial gap exists nonetheless Even though there are many intelligence analysts very few of them are aware of the various writings on intelligence analysis which could help them improve their own processes and products If the gap between scholarship and practice were to be bridged practitioners would be able to access and exploit the literature in order to acquire new ways to think about frame conceptualize and improve the analytic process and the resulting product This volume contributes to the broader discussion regarding mechanisms and methods for improving intelligence analysis processes and products It synthesizes these articles into a coherent whole linking them together through common themes and emphasizes the broader vision of intelligence analysis in the introduction and conclusion chapters The book will be of great interest to students of intelligence studies strategic

Agents of Subversion John P. Delury, 2022-10-15 *Agents of Subversion* reconstructs the remarkable story of a botched mission into Manchuria showing how it fit into a wider CIA campaign against Communist China and highlighting the intensity and futility of clandestine operations to overthrow Mao In the winter of 1952 at the height of the Korean War the CIA flew a covert mission into China to pick up an agent Trained on a remote Pacific island the agent belonged to an obscure anti communist group known as the Third Force based out of Hong Kong The exfiltration would fail disastrously and one of the Americans on the mission a recent Yale graduate named John T Downey ended up a prisoner of Mao Zedong s government for the next twenty years Unraveling the truth behind decades of Cold War intrigue John Delury documents the damage that this hidden foreign policy did to American political life The US government kept the public in the dark about decades of covert activity directed against China while Downey languished in a Beijing prison and his mother lobbied desperately for his release Mining little known Chinese sources Delury sheds new light on Mao s campaigns to eliminate counterrevolutionaries and how the chairman of the Chinese Communist Party used captive spies in diplomacy with the West *Agents of Subversion* is an innovative work of transnational history and it demonstrates both how the Chinese Communist regime used the fear of

special agents to tighten its grip on society and why intellectuals in Cold War America presciently worried that subversion abroad could lead to repression at home Ethics of Spying: A Reader for the Intelligence Professional Jan Goldman, 2023-11-15 The first volume introduced readers to ethics in intelligence operations Published when the U S was conducting operations in the post 9 11 era this book represents the first collection of articles to seriously study ethics for and about intelligence professionals The second volume established the codes of conduct that professionals in the private and public sectors would employ that could be separate from those of their private lives Ethics of Spying A Reader for the Intelligence Professional Volume 3 combines the best articles from the first two volumes It s reorganized into 5 parts and it contains new articles that expand and explain further the meaning and dichotomy of a working professional in the intelligence community and the national security and civil liberties they are entrusted with safeguarding New articles include Ethics of Human Intelligence Operations Tension and Strategy Ethics Phobia Tension and Strategy Sources and Bypassing Strategies Just Intelligence Theory Ethics Intelligence and Preemptive and Preventive Actions Speak No Evil Using Private Corporations to Conduct Intelligence Activities for National Security Purposes and Intelligence Research and Scholarship
