Code/Space Rob Kitchin, Martin Dodge, 2014-01-10 An analysis of the ways that software creates new spatialities in everyday life from supermarket checkout lines to airline flight paths After little more than half a century since its initial development computer code is extensively and intimately woven into the fabric of our everyday lives From the digital alarm clock that wakes us to the air traffic control system that guides our plane in for a landing software is shaping our world it creates new ways of undertaking tasks speeds up and automates existing practices transforms social and economic relations and offers new forms of cultural activity personal empowerment and modes of play In *Code Space* Rob Kitchin and Martin Dodge examine software from a spatial perspective analyzing the dyadic relationship of software and space The production of space they argue is increasingly dependent on code and code is written to produce space Examples of code space include airport check in areas networked offices and cafés that are transformed into workspaces by laptops and wireless access Kitchin and Dodge argue that software through its ability to do work in the world transduces space Then Kitchin and Dodge develop a set of conceptual tools for identifying and understanding the interrelationship of software space and everyday life and illustrate their arguments with rich empirical material And finally they issue a manifesto calling for critical scholarship into the production and workings of code rather than simply the technologies it enables a new kind of social science focused on explaining the social economic and spatial contours of software **Air Line Pilot** ,1989 **Mergent Public Utility & Transportation Manual** ,2003 **A Philosophy of Technology** Peter Vermaas, Peter Kroes, Ibo van de Poel, Maarten Franssen, Wybo Houkes, 2022-05-31 In *A Philosophy of Technology* From Technical Artefacts to Sociotechnical Systems technology is analysed from a series of different perspectives The analysis starts by focussing on the most tangible products of technology called technical artefacts and then builds step wise towards considering those artefacts within their context of use and ultimately as embedded in encompassing sociotechnical systems that also include humans as operators and social

rules like legislation Philosophical characterisations are given of technical artefacts their context of use and of sociotechnical systems Analyses are presented of how technical artefacts are designed in engineering and what types of technological knowledge is involved in engineering And the issue is considered how engineers and others can or cannot influence the development of technology These characterisations are complemented by ethical analyses of the moral status of technical artefacts and the possibilities and impossibilities for engineers to influence this status when designing artefacts and the sociotechnical systems in which artefacts are embedded The running example in the book is aviation where aeroplanes are examples of technical artefacts and the world aviation system is an example of a sociotechnical system Issues related to the design of quiet aeroplane engines and the causes of aviation accidents are analysed for illustrating the moral status of designing and the role of engineers therein Table of Contents Technical Artefacts Technical Designing Ethics and Designing Technological Knowledge Sociotechnical Systems The Role of Social Factors in Technological Development Ethics and Unintended Consequences of Technology **Federal Register** ,1986 Federal Register Index , *Federal Register, ...
