Treating Aids Politics Of Difference Paradox Of Prevention:

Treating AIDS Thurka Sangaramoorthy, 2014-03-26 There is an inherently powerful and complex paradox underlying HIV AIDS prevention between the focus on collective advocacy mobilized to combat global HIV AIDS and the staggeringly disproportionate rates of HIV AIDS in many places In *Treating AIDS* Thurka Sangaramoorthy examines the everyday practices of HIV AIDS prevention in the United States from the perspective of AIDS experts and Haitian immigrants in South Florida Although there is worldwide emphasis on the universality of HIV AIDS as a social political economic and biomedical problem developments in HIV AIDS prevention are rooted in and focused exclusively on disparities in HIV AIDS morbidity and mortality framed through the rubric of race ethnicity and nationality Everyone is at equal risk for contracting HIV AIDS Sangaramoorthy notes but the ways in which people experience and manage that risk and the disease itself is highly dependent on race ethnic identity sexuality gender immigration status and other notions of difference Sangaramoorthy documents in detail the work of AIDS prevention programs and their effect on the health and well being of Haitians a transnational community long plagued by the stigma of being stereotyped in public discourse as disease carriers By tracing the ways in which public knowledge of AIDS prevention science circulates from sites of surveillance and regulation to various clinics and hospitals to the social worlds embraced by this immigrant community she ultimately demonstrates the ways in which AIDS prevention programs help to reinforce categories of individual and collective difference and how they continue to sustain the persistent and pernicious idea of race and ethnicity as risk factors for the disease

Routledge Handbook on the Politics of Global Health Richard Parker, Jonathan García, 2018-12-07 In the early twenty first century key public health issues and challenges have taken centre stage on the global scene and health has been placed at the heart of our collective aspirations for human development and well being But significant debate exists not only about the causes but also about the possible solutions for nearly all of the most important global health challenges Competing visions of the values and perspectives that should underlie global health policies have emerged ranging from an emphasis on cost effectiveness and resource constraints on one extreme to new calls for health and human rights and renewed calls for health and social justice on the other The role of different intergovernmental agencies bilateral or unilateral donors public or private institutions and initiatives has increasingly been called into question whilst the spread of neoliberal policies and programmes and existing international trade regimes and intellectual property rights are deeply implicated in relation to global health responses This volume critically evaluates how the global health industry has evolved and how the interests of diverse political and economic stakeholders are shaping the context of a rapidly changing institutional landscape Bringing together leading authors from across the world the Handbook's eight sections explore Critical perspectives on global health Globalisation neoliberalism and health systems The changing shape of global health governance Development assistance and the politics of global health Scale up scale down and the sustainability of global health programmes Intellectual property rights trade relations and global

health Humanitarian emergencies and global health politics Human rights social justice and global health The Routledge Handbook on the Politics of Global Health addresses both the emerging issues and conceptualisations of the political strategies policy making processes and global governance of global health along with expanding upon and highlighting the critical priorities in this rapidly evolving field It provides an authoritative overview for students practitioners researchers and policymakers working in or concerned with the politics of public health around the globe A Companion to Medical Anthropology Merrill Singer, Pamela I. Erickson, César E. Abadía-Barrero, 2022-03-01 The fully revised new edition of the defining reference work in the field of medical anthropology A Companion to Medical Anthropology Second Edition provides the most complete account of the key issues and debates in this dynamic rapidly growing field Bringing together contributions by leading international authorities in medical anthropology this comprehensive reference work presents critical assessments and interpretations of a wide range of topical themes including global and environmental health political violence and war poverty malnutrition substance abuse reproductive health and infectious diseases Throughout the text readers explore the global historical and political factors that continue to influence how health and illness are experienced and understood The second edition is fully updated to reflect current controversies and significant new developments in the anthropology of health and related fields More than twenty new and revised articles address research areas including war and health illicit drug abuse climate change and health colonialism and modern biomedicine activist led research syndemics ethnomedicines biocommunicability COVID 19 and many others Highlighting the impact medical anthropologists have on global health care policy and practice A Companion to Medical Anthropology Second Edition Features specially commissioned articles by medical anthropologists working in communities worldwide Discusses future trends and emerging research areas in the field Describes biocultural approaches to health and illness and research design and methods in applied medical anthropology Addresses topics including chronic diseases rising levels of inequality war and health migration and health nutritional health self medication and end of life care Part of the acclaimed Wiley Blackwell Companions to Anthropology series A Companion to Medical Anthropology Second Edition remains an indispensable resource for medical anthropologists as well as an excellent textbook for courses in medical anthropology ethnomedicine global health care and medical policy *Epidemics and Society* Frank M. Snowden, 2019-01-01 As seen on 60 Minutes a brilliant and sobering Paul Kennedy Wall Street Journal look at the history and human costs of pandemic outbreaks The World Economic Forum 1 book to read for context on the coronavirus outbreak Well written highly entertaining and relevant Financial Times Best Books of 2020 Readers Choice This sweeping exploration of the impact of epidemic diseases looks at how mass infectious outbreaks have shaped society from the Black Death to today In a clear and accessible style Frank M Snowden reveals the ways that diseases have not only influenced medical science and public health but also transformed the arts religion intellectual history and warfare A multidisciplinary and comparative investigation of the medical and social history of the major epidemics this

volume touches on themes such as the evolution of medical therapy plague literature poverty the environment and mass hysteria In addition to providing historical perspective on diseases such as smallpox cholera and tuberculosis Snowden examines the fallout from recent epidemics such as HIV AIDS SARS and Ebola and the question of the world's preparedness for the next generation of diseases *Living with HIV in Post-Crisis Times* David A.B. Murray, 2021-08-18 Over the past decade effective prevention and treatment policies have resulted in global health organizations claiming that the end of the HIV AIDS crisis is near and that HIV AIDS is now a chronic but manageable disease These proclamations have been accompanied by stagnant or decreasing public interest in and financial support for people living with HIV and the organizations that support them minimizing significant global disparities in the management and control of the HIV pandemic The contributors to this edited collection explore how diverse communities of people living with HIV PLHIV and organizations that support them are navigating physical social political and economic challenges during these so called post crisis times Sustainable Sexual Health Tony Sandset, Eivind Engebretsen, Kristin Heggen, 2020-12-20 This book provides a textual analysis of the implementation of the UN's Sustainable Development Goals SDGs in health care Using sexual health as a case study the authors apply Foucault's notions of biopower and biopolitics to discuss the power struggle between local needs and wants and universal ambitions embedded in the SDG ideology Reproductive and sexual health are settings where health policy religious and cultural norms and gender policy meet personal and moral standards As such tensions dilemmas and conflicts are powerfully demonstrated in this interdisciplinary field of public health Tensions dilemmas and conflicts are particularly visible in reproductive and sexual health settings where health policy meets personal or moral standards gender policy and religious and cultural norms This book will be valuable supplementary material for graduate students and academics wishing to enhance their knowledge in the fields of global health sexual health reproductive health and rights and cultural studies The book will also be of interest to professionals and students within the disciplines of medical sociology medical anthropology sustainability studies gender and sexuality studies and public health **Same-Sex Marriage** Scott A. Merriman, 2022-01-11 A valuable survey of a cutting edge issue this book outlines the history of same sex marriage explaining how politics and religion have intersected to decide and control who can legally marry Marriage equality became law in the United States in 2015 with the Supreme Court ruling in *Obergefell v Hodges* Marriage is strictly speaking a secular ceremony requiring only civil sanction However many couples also seek the blessing of a religious body upon their union and not all religious bodies support marriage equality Some oppose it outright and some support it outright while others are divided This work examines the issue of same sex marriage in the U S and internationally It surveys the attitudes of major religions towards same sex marriage and also looks at leading and sometimes polarizing personalities like politician Pete Buttigieg and Kentucky clerk Kim Davis who exemplify both the religious and political sides of the issue The book's A Z organization makes it easy for readers to locate important court cases individuals religious bodies and social movements at

the center of the same sex marriage debate *Sweetness in the Blood* James Doucet-Battle, 2021-03-16 A bold new indictment of the racialization of science Decades of data cannot be ignored African American adults are far more likely to develop Type 2 diabetes than white adults But has science gone so far in racializing diabetes as to undermine the search for solutions In a rousing indictment of the idea that notions of biological race should drive scientific inquiry *Sweetness in the Blood* provides an ethnographic picture of biotechnology's framings of Type 2 diabetes risk and race and importantly offers a critical examination of the assumptions behind the recruitment of African American and African descent populations for Type 2 diabetes research James Doucet Battle begins with a historical overview of how diabetes has been researched and framed racially over the past century chronicling one company's efforts to recruit African Americans to test their new diabetes risk score algorithm with the aim of increasing the clinical and market value of the firm's technology He considers African American reticence about participation in biomedical research and examines race and health disparities in light of advances in genomic sequencing technology Doucet Battle concludes by emphasizing that genomic research into sub-Saharan ancestry in fact underlines the importance of analyzing gender before attempting to understand the notion of race No disease reveals this more than Type 2 diabetes *Sweetness in the Blood* challenges the notion that the best approach to understanding managing and curing Type 2 diabetes is through the lens of race It also transforms how we think about sugar filling a neglected gap between the sugar and molasses sweetened past of the enslaved African laborer and the high fructose corn syrup and corporate fed body of the contemporary consumer laborer *Forging Radical Alliances Across Difference* Jill M. Bystydzienski, Steven P. Schacht, 2001-11-12 As we enter the twenty first century scholars activists and others concerned with social change increasingly realize that in order to transform society effective coalitions among different groups working for social justice need to be created and maintained However most of the research and writing about coalitions provide rather limited approaches to the study and understanding of radical alliances i.e. coalitions whose goals are to fundamentally change interpersonal relations and social structure in order to achieve equality and true social justice This anthology challenges dominant approaches of explaining social movements and coalition building Based on numerous case studies of alliances created between disparate peoples and among a variety of groups the authors show that both resource mobilization theories and identity politics frameworks for the most part are inadequate for conceptualizing how alliances have been and can be created across boundaries of gender race ethnicity class nationality ideology sexual orientation and age The theoretical approach we propose suggests that coalitions are fluid sites of collective behavior where the blending of multiple identities with political activism interact with structural conditions to influence the development of commitments strategies and specific actions This analogy makes a contribution to a body of knowledge that aims to understand and explain how radical coalitions work in order to enable the development of visions and plans for change that advance and sustain political and social activity **Alcohol Health and Research World**, 1992 *Recent Acquisitions* Ohio State University.
