management systems management and the complex flight environment of today's busy airspace. This is a very different approach from the practice of traditional maneuver-based flight training used heretofore. With a realization of the inadequacy of maneuver-based training as applied to TAA, The Pilot's Manual Access to Flight embodies the state-of-the-art industry training standards of scenario-based training, SBT, learner-centered grading and involvement, and single-pilot resource management, SRM. These are real-world skills taught with a train-like-you-fly philosophy, treating each and every lesson as a real flight. This is where harnessing the power of all available resources and aeronautical decision making, ADM, become second nature. Whereas maneuver-based training focused specifically on simply learning to control the aircraft, this new methodology involves considering an entire flight and all its component aspects from beginning to end. *The Pilot's Manual*, 2010
