Writing Systems of the World Akira Nakanishi, 1980. [The World Atlas of Language Structures](#) Martin Haspelmath, 2005-07-21. The World Atlas of Language Structures is a book and CD combination displaying the structural properties of the world's languages. 142 world maps and numerous regional maps all in colour display the geographical distribution of features of pronunciation and grammar, such as number of vowels, tone systems, gender, plurals, tense, word order, and body part terminology. Each world map shows an average of 400 languages and is accompanied by a fully referenced description of the structural feature in question. The CD provides an interactive electronic version of the database which allows the reader to zoom in on or customize the maps to display bibliographical sources and to establish correlations between features. The book and the CD together provide an indispensable source of information for linguists and others seeking to understand human languages. The Atlas will be especially valuable for linguistic typologists.

grammatical theorists historical and comparative linguists and for those studying a region such as Africa Southeast Asia North America Australia and Europe It will also interest anthropologists and geographers More than fifty authors from many different countries have collaborated to produce a work that sets new standards in comparative linguistics No institution involved in language research can afford to be without it

An Atlas of Endangered Alphabets Tim Brookes, 2024-08-29 A global exploration of the many writing systems that are on the verge of vanishing and the stories and cultures they carry with them If something is important we write it down Yet 85% of the world's writing systems are on the verge of vanishing not granted official status not taught in schools discouraged and dismissed When a culture is forced to abandon its traditional script everything it has written for hundreds of years sacred texts poems personal correspondence legal documents the collective experience wisdom and identity of a people is lost This Atlas is about those writing systems and the people who are trying to save them From the ancient holy alphabets of the Middle East now used only by tiny sects to newly created African alphabets designed to keep cultural traditions alive in the twenty first century from a Sudanese script based on the ownership marks traditionally branded into camels to a secret system used in one corner of China exclusively by women to record the songs and stories of their inner selves this unique book profiles dozens of scripts and the cultures they encapsulate offering glimpses of worlds unknown to us and ways of saving them from vanishing entirely
