Continuous Improvement in the Science Classroom Jeffrey J. Burgard, 2009-01-09. Schools were originally designed to provide opportunity to learn and used the bell curve to gauge their success. The expectations have changed and schools are required to make sure all children learn, but the systems, core processes, and management styles that have always driven teaching and learning have not. New programs and curriculum cannot just be added onto these outdated classroom interrelationships and be expected to produce different results. Now, by managing with W. Edwards Deming's Theory of Profound Knowledge, science educators can improve their systems and achieve the needed results. Deming's management theories created Japan's Industrial Miracle in the 1970s by improving quality and employee morale while decreasing costs. It is a philosophy that focuses on experimentation and allows the people who do the work to provide input into improving the work. This book shows science teachers how to apply that same philosophy to engage students in the improvement process to increase learning and enthusiasm while decreasing failure. Combined with the latest brain and educational research, it will enlighten, empower, and engage teachers and students to continuously improve their classroom. In this second edition of **Continuous Improvement in the Science Classroom**, Jeffrey Burgard shares new learning and insights from the last 10 years of workshop facilitation and his own classroom experience. He delves deeper into the philosophy, clarifies each improvement process, and reveals new, highly effective applications. Each process transforms different aspects of the classroom and when implemented concurrently, creates a dynamic, continuously improving learning system. It is time to have an educational miracle: science classrooms with high standards, high achievement, and high enthusiasm.

Permission to Forget Lee Jenkins, 2013-04-01. This book describes 10 decades of wasteful practices buried deep within U.S. schools. Today's educators did not invent these wasteful practices; they inherited them. Five of the root causes are wasting time, and five are wasting student potential. Ten years ago, the first edition of *Permission to Forget* was published, and now this landmark anniversary edition is available. Its legacy of improvement is reported after report from educators describing what happens in schools when these root causes are removed. It should not go unnoticed that root cause removal is free, unlike legislated reforms. Think about it: free. But teachers, principals, and district superintendents must collaborate in order to remove these root causes. Teachers can not remove them by themselves. Principals can not remove them by themselves. Superintendents can not remove them by themselves. Only together can teams of educators lead the removal of these 10 wasteful practices and provide America the education it desires.
