Traditional Construction Patterns Stephen Mouzon, Susan Henderson, 2004-10-11 Design detail rules of thumb Cover **Le Corbusier, the Dishonest Architect** Malcolm Millais, 2018-01-23 This is not a book for architects but for all those that have suffered consciously and unconsciously from modern architecture and have wondered how it came about This was largely due to one man an architect called Le Corbusier For some he was a genius but the truth is he was a sham a fake a charlatan whose only gift was for self publicity He was the most influential architect of the second half of the twentieth century his influence overwhelmed the architectural profession on a global scale who swallowed his publicity whole and still hold him in awe For the rest of the world the mere mortals his influence was disastrous as traditional buildings were destroyed and replaced by featureless boxes of varying sizes imposing a dreariness hitherto unimagined As usual it was the poor who suffered most as they were herded into tower blocks These were often grouped into estates that ringed many towns and cities which then degenerated into high rise slums with all the well known attendant social problems This book exposes the myths that surround Le Corbusier detailing the endless failures of his proposals and his projects These were due to his profound dishonesty both as a person and as an architect His legacy was an architectural profession that believed and still believe they were designing buildings based on logic functionality and honesty whereas they were doing the opposite

Building a Timeless House in an Instant Age Brent Hull, 2014-08-01 The author of Traditional American Rooms examines the evolution of home construction making a case against mass produced homes HISTORY s Lone Star Restoration star Brent Hull is a master craftsman and hands on preservationist Hull a Foreword Reviews Book of the Year Finalist for architectural non fiction challenges us to consider the impact our decisions will have when building a house What do our homes say about us What stories are they telling Are they declarations of integrity beauty and heritage Or do they suggest we have lost our sense of value craft and harmony Nationally recognized as an authority on historic design architecturally correct moldings and millwork Hull is uniquely qualified to speak to the craft of building and art of design In an age of instant homes how do we build something timeless that weaves a tale of character values history and heart The decisions we make for our homes are not inconsequential What we build defines us In fact the contrast between the way we build today and how structures used to be built has become only more vivid What happened to craft What happened to the art of building Our values and what we believe about life have changed as well We have come to see houses as a tradable commodity We live in a time that is obsessed with what s next We need to be careful of fooling ourselves into thinking that a bottom line

mentality is the best way to approach building a home Now is the time to examine ourselves our motives and our hearts
