This book introduces the basic principles and practices of this popular martial art and includes the biography of the Founder.

Gordon,2019-07-16 Drawing on the author's lifelong practice in the non competitive and defensive Japanese art of Aikido this book examines education as self cultivation from a Japanese philosophy e.g Buddhist perspective Contemplative practices such as secular mindfulness meditation are being increasingly integrated into pedagogical settings to enhance social and emotional learning and well being and to address stress induced overwhelm due to increased pressures on the education

system and its constituents The chapters in this book explore the various ways through the lens of this non violent relational art of Aikido that pedagogy is always something being practiced on the level of psychological somatic and emotional registers and thus holding potential for transformation into being more relational ecological minded and reflecting more embodied attunement Positioning education as a practice one of self discovery the author argues that one can approach personal development as engaging in a spiritual process of integrating mind and body towards full presence of being and existence
