55 Botanical Gardens and arboreta of 29 countries have been described in detail An exhaustive bibliography has also been included as a chapter for detailed consultations Towns and Cities: Function in Form Mr Julian Hart, 2015-10-28 The book makes a step change from any other comparable studies by understanding our towns and cities in terms of function in form This helps us to appreciate why every town is a recognisable town wherever it is Different urban environments in different parts of the world past and present can come to be seen according to their similarities instead of their differences Furthermore by appreciating how the economic influences of everyday life structure our towns and cities we can in turn begin to understand better how the structure of towns and cities affect the quality of life of inhabitants and the cohesiveness of communities In covering all scales from inside the home to macrostructure of the city the book encapsulates urban or town planning and does not seek to distinguish between the various design disciplines **Urban Landscapes** Eric Winter, 1971
