Transient Space The Tourist Syndrome:

Transient Spaces Marina Sorbello, 2010 Borderities and the Politics of Contemporary Mobile Borders A.

Amilhat-Szary, F. Giraut, 2015-06-08 This book explores the emerging forms and functions of contemporary mobile borders. It deals with issues of security, technology, migration and cooperation while addressing the epistemological and political questions that they raise. The borderities approach illuminates the question of how borders can be the site of both power and counter power.

Borderscaping: Imaginations and Practices of Border Making Dr Chiara Brambilla, Dr Jussi Laine, Professor Gianluca Bocchi, Professor James W. Scott, 2015-12-28 Using the borderscapes concept, this book offers an approach to border studies that expresses the multilevel complexity of borders from the geopolitical to social practice and cultural production at and across the border. Accordingly, it encourages a productive understanding of the processual, de-territorialized and dispersed nature of borders and their ensuring regimes in the era of globalization and transnational flows, as well as showcasing border research as an interdisciplinary field with its own academic standing. Contemporary bordering processes and practices are examined through the borderscapes lens to uncover important connections between borders as a challenge to national and EU policies and borders as potential elements of political innovation through conceptual re-framings of social, political, economic and cultural spaces. The authors offer a nuanced and critical re-reading and understanding of the border not as an entity to be taken for granted but as a place of investigation and as a resource in terms of the construction of novel geo-political imaginations, social and spatial imaginaries and cultural images. In so doing, they suggest that rethinking borders means deconstructing the interweaving between political practices of inclusion/exclusion and the images created to support and communicate them on the cultural level by Western territorialist modernity. The result is a book that proposes a wandering through a constellation of bordering policies, discourses, practices and images to open new possibilities for thinking, mapping, acting and living borders under contemporary globalization.

Border Aesthetics Johan

Schimanski, Stephen F. Wolfe, 2017-04-01 Few concepts are as central to understanding the modern world as borders, and the now thriving field of border studies has already produced a substantial literature analyzing their legal, ideological, geographical and historical aspects. Such studies have hardly exhausted the subject's conceptual fertility; however, as this pioneering collection on the aesthetics of borders demonstrates. Organized around six key ideas: ecology, imaginary, visibility, palimpsest, sovereignty and waiting, the interlocking essays collected here provide theoretical starting points for an aesthetic understanding of borders developed in detail through interdisciplinary analyses of literature, audio, visual borderscapes, historical and contemporary ecologies, political culture and migration.

Cities in Time Ali

Madanipour, 2017-02-23 From street markets and pop-up shops to art installations and Olympic parks, the temporary use of urban space is a growing international trend in architecture and urban design. Partly a response to economic and ecological crisis, it also claims to offer a critique of the status quo and an innovative way forward for the urban future. *Cities in Time*

aims to explore and understand the phenomenon offering a first critical and theoretical evaluation of temporary urbanism and its implications for the present and future of our cities The book argues that temporary urbanism needs to be understood within the broader context of how different concepts of time are embedded in the city In any urban place multiple discordant and diverse timeframes are at play and the chapters here explore these different conceptions of temporality their causes and their effects Themes explored include how institutionalised time regulates everyday urban life how technological and economic changes have accelerated the city's rhythms our existential and personal senses of time concepts of memory and identity virtual spaces ephemerality and permanence
