Eye Tracking for STEM Education Research: New Perspectives Pascal Klein, Martin Rusek, Maike Schindler, 2024-04-04 A modern approach to improving education uses the components of experimental scientific research practices based on objective data dissemination of results and the use of modern technologies STEM education research is maturing and new tools and analysis techniques become available As one example eye tracking the recording of persons eye movements has been growing in popularity as it enables researchers to study learning materials effectiveness problem solving and even students approaches during experimentation Eye movements as captured using eye tracking can reveal information about a student s attention and cognition on a process level going well beyond classical product based assessment techniques such as questionnaires or tests

Recent Advances in Parallel Virtual Machine and Message Passing Interface Yiannis Cotronis, Jack Dongarra, 2003-06-30 Parallel Virtual Machine PVM and Message Passing Interface MPI are the most frequently used tools for programming according to the message passing paradigm which is considered one of the best ways to develop parallel applications This volume comprises 50 revised contributions presented at the Eighth European PVM MPI Users Group Meeting which was held on Santorini Thera Greece 23-26 September 2001

The conference was organized by the Department of Informatics and Telecommunications University of Athens Greece This conference has been previously held in Balatofured Hungary 2000 Barcelona Spain 1999 Liverpool UK 1998 and Krakow Poland 1997 The first three conferences were devoted to PVM and were held at the TU Munich Germany 1996 the ENS Lyon France 1995 and the University of Rome 1994 This conference has become a forum for users and developers of PVM MPI and other message passing environments Interaction between these groups has proved to be very useful for developing new ideas in parallel computing and for applying some of those already existent to new practical fields The main topics of the meeting were evaluation and performance of PVM and MPI extensions and improvements to PVM and MPI algorithms using the message passing paradigm and applications in science and engineering based on message passing The conference included one tutorial on MPI and 9 invited talks on advances in MPI cluster computing network computing Grid computing and parallel programming and programming systems These proceedings contain papers on the 46 oral presentations together with 4 poster presentations

Euro Abstracts, 1997 *Signal Processing in Telecommunications* Ezio Biglieri, Marco Luise, 2012-12-06 It is probably an overstatement to say that the discipline of telecommunication systems is becoming an application of digital signal processing DSP However there is no doubt that by the mid 1980s integrated circuit technology has advanced to such an extent that revolutionary advances in telecommunications are fostered by the introduction of new and powerful DSP algorithms Actually DSP has been recently playing a major role in the development of telecommunication systems to name just one of the most widespread applications where this interaction has been most effective we may mention the use of intelligent DSP to improve the performance of transmission systems by allowing sophisticated algorithms to be

implemented in radio transmitters and receivers for personal communications Other areas have equally benefited by the latest advances of DSP speech coding and synthesis speech recognition and enhancement radar sonar digital audio and remote sensing just to cite a few With this in mind when choosing the topic for the 7th Tyrrhenian Workshop on Digital Communications whose contributions are collected in this book we aimed at focusing on the state of the art and the perspectives of the interaction between DSP and telecommunications two disciplines that are becoming increasingly intertwined Although by no means exhaustive of all the applications of DSP to telecommunications we believe that the material presented in this book pinpoints the most interesting among them and hence it will be considered as a useful tool for investigating this complex and highly challenging field Catalog of Copyright Entries.
