*Toshiba of Canada Limited Information Systems Group shall not be liable for damages of any kind for use of this information, which is subject to change without notice.

Central Processing Unit ("CPU") Performance Disclaimer: CPU performance on your computer product may vary from specifications under the following conditions:

- use of your computer without an external AC power source;
- use of battery power instead of AC power;
- use of certain multimedia power or media with special features;
- use of a wireless LAN device (such as wireless network);
- use of peripheral devices (such as flash memory, USB devices, external storage devices, etc.);
- use of computer in a room with low air pressure (high altitude > 1,000 meters or 10,000 feet above sea level);
- use of computer in temperatures outside the range of 5°C to 35°C or in humidity over 90% or in high altitude (40 degrees Celsius or above).

CPU performance may also vary from specifications due to design configuration, video graphics configuration, application software, power management settings, and other factors. Actual CPU performance may be lower than specifications. For more information, please contact Toshiba Technical Support for more information.

Hard Disk Drive Definition: Gigabyte (GB) means 1,000,000,000 bytes using powers of 10. The computer operating system formats storage capacity using powers of 2 for the definition of 1 GB = 1,073,741,824 bytes, and therefore displays less storage capacity. Available storage capacity will also be less if the preloaded software applications, operating system and application software, is not formatted to operate with this.

CPU: Graphics processor unit ("GPU") performance may vary depending on product model, configuration, application, power management settings and features enabled. GPU performance is only optimized when operating on AC power mode and may decrease considerably when operating on battery power mode.

Memory: 1 MB = 1 Mega million bytes when used to describe the capacity of system memory allocated to support graphics. Max can be reduced by graphics performance and memory feature. Actual available memory may be less if you are completing activities. The amount of usable system memory allocated to support graphics may vary depending on the graphics controller, applications utilized, memory capacity and other factors. For PC's configured with a GPU, the system memory size will vary by model and system specifications.

TFT Display Definition: 1 inch of light from your screen is one TFT display when you refer to your PC. Your display contains one million or more TFT's. Each TFT is called a pixel. Occasionally, a few pixels may appear on your display as stuck pixels. Any pixel not functioning as designed may appear on your display as an incorrect color, dot or lack of color. TFT manufacturing technology.

LCD: Over a period of time, and depending on the usage of the computer, the brightness of the LCD screen will decrease. This is an inherent characteristic of LCD technology. Maximum brightness is not available when operating in full power saver. Turning off the screen or computer is recommended when you are not working to preserve the brightness of the screen.

Weight: Weight may vary depending on actual configuration.

Battery: Battery life may vary considerably depending on product model, configuration, applications, power management settings and features utilized, as well as the natural part-to-part variations produced by the design of individual components. Published battery life numbers are obtained on select models and may vary by location and the time of publication. Refer to more notes depending on usage. Battery may not charge while computer is connected to high power USB ports or some USB hubs. Battery charging may be limited by the ambient temperature of your computer and the battery's temperature. If your computer's battery pack has the appropriate attachment that allows it to be charged outside your computer, you may purchase a spare battery pack. See the accessories information that allows it to be charged outside your computer or visit the Toshiba Direct website at www.toshibadirect.com

Software: The software pre-loaded on your computer is subject to change without notice. The reproduction of software not authorized for sale is prohibited. For further information on software, please read the end user agreement.

Notice of No Liability:
Toshiba of Canada Limited makes every effort to offer the best of performance and service for its customers and the information provided here in product specifications, prices, promotional programs and availability are all subject to change without notice. For the most up-to-date information, please visit our website at www.toshiba.ca or contact Toshiba's Customer Service Centre at 1-800-268-1222.
