Offshore Energy and Marine Spatial Planning Katherine L. Yates, Corey J. A. Bradshaw, 2018-03-29 The generation of offshore energy is a rapidly growing sector competing for space in an already busy seascape This book brings together the ecological economic and social implications of the spatial conflict this growth entails Covering all energy generation types wind wave tidal oil and gas it explores the direct and indirect impacts the growth of offshore energy generation has on both the marine environment and the existing uses of marine space Chapters explore main issues associated with offshore energy such as the displacement of existing activities and the negative impacts it can have on marine species and ecosystems Chapters also discuss how the growth of offshore energy generation presents new opportunities for collaboration and co location with other sectors for example the co location of wild capture fisheries and wind farms The book integrates these

issues and opportunities and demonstrates the importance of holistic marine spatial planning for optimising the location of offshore energy generation sites It highlights the importance of stakeholder engagement in these planning processes and the role of integrated governance with illustrative case studies from the United States United Kingdom northern Europe and the Mediterranean It also discusses trade off analysis and decision theory and provides a range of tools and best practices to inform future planning processes

Marine Transboundary Conservation and Protected Areas Peter

Mackelworth,2016-04-28 The marine environment does not naturally respect arbitrary international boundaries The establishment and management of transboundary marine protected areas therefore presents major governance challenges This book analyses a series of marine transboundary conservation initiatives embedded in varying contextual situations to examine the underlying reasons for their success or failure Utilising an adapted pathways of influence framework it provides insights into the development of marine transboundary conservation initiatives looking at the effectiveness of international rules international norms and discourse market forces and direct access to policy making Examples come from a wide range of jurisdictions including territorial seas continental shelves exclusive economic zones and areas beyond national jurisdiction Case studies include initiatives in the Coral Triangle West Africa Central America the Wadden Sea the Red Sea and the Mediterranean Sea In addition the authors assess the potential for developing wider international cooperation as a result of relationships forged through involvement within these marine transboundary conservation initiatives

The Ecosystem Approach in Ocean Planning and Governance David Langlet,Rosemary Rayfuse,2018-12-24 The Ecosystem Approach in Ocean Planning and Governance takes stock of the challenges associated with implementing an ecosystem approach in ocean governance In addition to theorizing the notion of Ecosystem Approach and its multifaceted implications the book provides in depth analyses of lessons learned and remaining challenges associated with making the Ecosystem Approach fully relevant and operational in different marine policy fields including marine spatial planning fisheries and biodiversity protection In doing so it adds much needed legal and social science perspectives to the existing literature on the Ecosystem Approach in relation to the marine environment While focusing predominantly on the European context the perspective is enriched by analyses from other jurisdictions including the USA

Marine Policy Mark Zacharias,Jeff Ardron,2019-06-20

This book provides readers with a foundation in policy development and analysis describing how policy including legal mechanisms are applied to the marine environment It presents a systematic treatment of all aspects of marine policy including climate change energy environmental protection fisheries mining and transportation The health of marine environments worldwide is steadily declining and these trends have been widely reported Marine Policy summarizes the importance of the ocean governance nexus discussing current and anticipated challenges facing marine ecosystems human activities and efforts to address these threats This new fully revised edition has been updated throughout including content to reflect the recent advances in ocean management and international law Chapters on shipping energy mining and integrated approaches to

ocean management have been significantly reworked plus completely new chapters on the United Nations Convention on the Law of the Sea and the impacts of climate change have been added Pedagogical features for students are included throughout Aligned with current course offerings this book is an ideal introduction for undergraduates and graduate students taking marine affairs science and policy courses *The Law of the Sea and the Planetary Crisis* Nengye Liu, Shirley V. Scott, 2025-03-07 This book examines the challenge of negotiating and implementing new legal regimes addressing contemporary ocean challenges in the context of uncertain planetary futures The book covers the themes of climate change biodiversity loss and pollution Contributors examine a range of emerging understudied issues including the legal regulation of ocean acidification the development of the mining code by the International Seabed Authority the implementation of the 2023 Biodiversity Beyond National Jurisdiction BBNJ Agreement and compliance mechanisms developed by the International Maritime Organization Other chapters look at energy transition green technology and marine pollution from shipping Contributing to global discussions on sustainable development this book will be of vital interest to scholars of the law of the sea environmental law and sustainable development *Ocean Energy* Glen Wright, Sandy Kerr, Kate Johnson, 2017-12-14 Energy from wave and tidal power is a key component of current policies for renewable sources of energy This book provides the first comprehensive exploration of legal economic and social issues related to the emerging ocean energy industry in particular wave and tidal energy technologies This industry is rapidly developing and considerable technical literature has developed around the technology However it is shown that challenges relating to regulation and policy are major impediments to industry development and these aspects have not previously been sufficiently highlighted and studied The book informs policymakers industry participants and researchers of the key issues in this developing field Ocean energy is considered in the context of the blue economy and an industrialising ocean and the topics covered include development of policy policy instruments risk and delay in technology development legal aspects consenting processes resource management impact assessment human interactions conflicts consultation community benefits and spatial planning of the marine environment While offshore wind energy sited in the oceans but not strictly derived from the ocean is not the primary focus of the book there is also discussion of the similarities and differences between offshore wind and wave and tidal power policy dimensions **Maritime Clusters and the Ocean Economy** Peter B. Myles, 2017-09-07 Over the last decade the concept of clustering has become a central idea for analyzing the competitiveness of nations industries and firms This book shows how the cluster concept can be usefully applied to the study of maritime activities Such activities including shipping shipbuilding and port and maritime services are clearly geographically concentrated in a number of maritime clusters However as the author shows these are having to compete with other uses of the coasts and oceans including capture fisheries marine aquaculture offshore energy and tourism Sound governance and planning is therefore required to manage the competing claims for ocean space The book shows how competing industries and other stakeholders can cooperate and

benefit from an integrated approach to the development of maritime clusters The contribution of approaches such as integrated coastal zone management and innovations such as ocean business councils as well as coordinated networks of maritime clusters are reviewed Case studies are included from around the world including detailed examples of the development of the Nelson Mandela Bay Maritime Cluster in South Africa and from Poland in the Baltic Sea *Ocean Law and Policy* Carlos Espósito, James Kraska, Harry N. Scheiber, Moon-Sang Kwon, 2016-10-11 In the years since 1994 when the UN Convention on the Law of the Sea UNCLOS entered into force the ocean law regime has been profoundly affected by an interplay of new forces in global ocean affairs Numbered among them are innovations in technology and science the emergence of intensified piracy and other challenges to maritime security national and regional programs In *Ocean Law and Policy Twenty Years of Development under the UNCLOS Regime* experts from fourteen countries present nineteen papers that provide insightful analyses of these wide ranging issues that form the emerging new context of UNCLOS as a keystone to a working regime system Accessible as well as authoritative this volume offers to general readers as well as academics policy officials and legal experts a set of important analyses and provocative insights forming a major contribution to the literature of ocean studies
