Tools to Aid Environmental Decision Making Virginia H. Dale, Mary R. English, 2012-11-26 Environmental decision making is like politics mostly local In fact making decisions about the environment at the subnational level in state regional and local jurisdictions is a lot like politics For resolving environmental issues demands but often resists a balance between deeply held feelings and stark confrontations among opposing views This volume describes tools that should make the decision maker s lot a bit more tolerable The authors would be the last to suggest that these decision aiding tools will somehow bring a benign order to issues that reach to people s fundamental values What they can help do is to keep the debate focused on the important issues to serve up useful options and to narrow the range of disagreement Even this is a challenging assignment Still why bother The chief reason is that the locus of environmental decision making has in the past decade or so shifted from the national to the subnational level a convenient if colorless term to denote the hurly burly of environmental controversy outside the Washington Beltway For example New England has taken a regional stand on tropospheric ozone control and California requires automotive pollution controls that some other jurisdictions have partially adopted This shift is a profound but not unexpected result of the way environmental policy has evolved since the modern environmental movement began around the late 1960s Back then the pendulum was swinging the other way

Comparative Risk Assessment and Environmental Decision Making Igor Linkov, Abou Bakr Ramadan, 2006-03-02 Decision making in environmental projects is typically a complex and confusing process characterized by trade offs between socio political environmental and economic impacts Comparative Risk Assessment CRA is a methodology applied to facilitate decision making when various activities compete for limited resources CRA has become an increasingly accepted research tool and has helped to characterize environmental profiles and priorities on the regional and national level CRA may be considered as part of the more general but as yet quite

academic field of multi criteria decision analysis MCDA Considerable research in the area of MCDA has made available methods for applying scientific decision theoretical approaches to multi criteria problems but its applications especially in environmental areas are still limited The papers show that the use of comparative risk assessment can provide the scientific basis for environmentally sound and cost efficient policies strategies and solutions to our environmental challenges

Decision Support Systems for Risk-Based Management of Contaminated Sites Antonio Marcomini, Glenn Walter Suter II, Andrea Critto, 2008-12-16 Decision Support Systems for Risk Based Management of Contaminated Sites addresses decision making in environmental risk management for contaminated sites focusing on the potential role of decision support systems in informing the management of chemical pollutants and their effects Considering the environmental relevance and the financial impacts of contaminated sites all over the post industrialized countries and the complexity of decision making in environmental risk management decision support systems can be used by decision makers in order to have a more structured analysis of a problem at hand and define possible options of intervention to solve the problem Accordingly the book provides an analysis of the main steps and tools for the development of decision support systems namely environmental risk assessment decision analysis spatial analysis and geographic information system indicators and endpoints Sections are dedicated to the review of decision support systems for contaminated land management and for inland and coastal waters management Both include discussions of management problem formulation and of the application of specific decision support systems This book is a valuable support for environmental risk managers and for decision makers involved in a sustainable management of contaminated sites including contaminated lands river basins and coastal lagoons Furthermore it is a basic tool for the environmental scientists who gather data and perform assessments to support decisions developers of decision support systems students of environmental science and members of the public who wish to understand the assessment science that supports remedial decisions *Using Ecological Models to Support and Shape Environmental Policy Decisions* Chiara Piroddi, Diego Macias, Marilaure Gregoire, Johanna Jacomina Heymans, Howard Townsend, 2022-02-10 Forum for Applied Research and Public Policy, 1999 *William R.
