The SAGE Encyclopedia of Contemporary Early Childhood Education Donna Couchenour, J. Kent

Chrisman, 2016-08-16 The general public often views early childhood education as either simply babysitting or as preparation for later learning. Of course, both viewpoints are simplistic. Deep understanding of child development, best educational practices based on development, emergent curriculum, cultural competence, and applications of family systems are necessary for high quality early education. Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age. The SAGE Encyclopedia of Contemporary Early Childhood Education presents in three comprehensive volumes advanced research, accurate practical applications of research, historical foundations, and key facts from the field of contemporary early childhood education. Through approximately 425 entries, this work includes all areas of child development: physical, cognitive, language, social, emotional, aesthetic, as well as a comprehensive review of best educational practices with young children, effective preparation for early childhood professionals, and policy making practices, and addresses such questions as: How is the field of early childhood education defined? What are the roots of this field of study? How is the history of early childhood education similar to yet different from the study of public education? What are the major influences on understandings of best practices in early childhood education?

Speech-Language Pathologists in Early Childhood Intervention Kathleen D. Ross, 2017-11-01

Speech Language Pathologists in Early Childhood Intervention Working with Infants, Toddlers, Families, and Other Care Providers presents practicing clinicians and graduate students with the skills necessary to provide evidence-based, best practice services to young clients struggling to gain functional communication skills and their families. It also serves to broaden the understanding of early intervention within the field of speech language pathology. Through research, real life scenarios, and practical documents, the text presents positive advocacy for this population. The text begins with a general overview of the history and rationale for early childhood intervention, including the Individuals with Disabilities Education Act (IDEA) Part C program and Early Head Start, as well as a description of the need for speech language pathologists in early intervention. The

majority of the text offers assessment and intervention strategies and tools including specific tests and curricula training resources and the importance of using ongoing assessment for this young age. Strategies for coaching parents and collaborating with professional colleagues as well as working within daily routines in natural environments for the child are all integral components of the Part C early intervention program and are interwoven throughout. The text concludes with the importance of viewing children holistically, taking into consideration all aspects of a child's being and acknowledging the interrelatedness of their developing skills as well as the importance of family in their development. Speech language pathologists have a critical role in evaluation, assessment, and intervention for young children with or at risk for communication disorders. *Speech Language Pathologists in Early Childhood Intervention* creates a pathway for investing in the principles and activities of early intervention that can lead to best practice and positive outcomes for this young population.
