Transforming Information Literacy Instruction Using Learner Centered Teaching:

Transforming Information Literacy Instruction Using Learner-centered Teaching Joan R. Kaplowitz, 2012 Do you feel like it's long past time to totally transform information literacy instruction? If so, this indispensable new book by Joan Kaplowitz has everything you need to help you incorporate learner-centred teaching (LCT) into information literacy instruction. ILI combining important grounding in the discipline with usable instructions and tips. Collaboration, participation, and responsibility are emphasized. You get first-hand information on the transition to learner-centred teaching through Joan Kaplowitz's own experience as well as real-life examples from instructors in the field who support the learner-centred teaching model. Part One explains how learner-centred teaching works and why it's so effective, offers tips and tricks to listen to, engage with, and inspire your learners, and provides essential background information and resources to paint a well-rounded picture of the learner-centred teaching model. Part Two helps you plan for LCT by covering different methods like modelling, questioning, and collaborative group work. You'll also gain valuable advice on measuring outcomes, assessment, and selecting the best instructional activities based on those outcomes. Part Three brings everything together by applying LCT to practice, with tips on strengthening the face-to-face learning experience, creating the right environment, and discussing important drawbacks to consider in certain classrooms. An entire chapter is devoted to creating an online learner-centred experience that includes pros and cons, special challenges, designing the online environment to get the most out of LCT, and the key elements for online instruction. Perspectives from school, public, college, university, and special libraries provide best practices from all areas of librarianship. Readership: Librarians, information professionals, and students on librarianship and information science courses.

Transforming Information Literacy Instruction Amy R. Hofer, Silvia Lin Hanick, Lori Townsend, 2018-11-16 Provides information literacy practitioners with a thorough exploration of how threshold concepts can be applied to information literacy, identifying important elements and connections between each concept and relating theory to practical methods that can transform how librarians teach. A model that emerged from the Enhancing Teaching Learning Environments project in Great Britain, threshold concepts are those transformative core ideas and processes in a given discipline that define the ways of thinking and practicing shared by experts. Once a learner grasps a threshold concept, new pathways to understanding and learning are opened up. The authors of this book provide readers with both a substantial introduction to and a working knowledge of this emerging theory and then describe how it can be adapted for local information literacy instruction contexts. Five threshold concepts are presented and covered in depth within the context of how they relate and connect to each other. The chapters offer an in-depth explanation of the threshold concepts model and identify how it relates to various disciplines and our own discipline, information science, and to the understandings we want our students to acquire. This text will benefit readers in these primary audiences: academic librarians involved with information literacy efforts at their institutions, faculty teaching in higher education, upper-level college administrators.
