Dow MD,2015-03-30 In this series of clinical vignettes a board certified psychiatrist and life fellow of the American Psychiatric Association illustrates the effectiveness of dream therapy in treating posttraumatic stress disorder PTSD Posttraumatic stress disorder PTSD can be disabling and difficult to treat often leading to depression suicide and homicide in extreme cases In this clinical based reference acclaimed psychiatrist and neuroscience researcher Bruce Dow provides a step by step approach for implementing dream revision therapy a treatment proven to eliminate nightmares flashbacks anxiety and other debilitating effects of PTSD Drawing from work with patients in both military and civilian settings Dow shows how to utilize imagery rehearsal exercises to help mitigate the effects of the illness The vast majority of the book s 11 chapters focus on clinical case studies of patients who have suffered under the effects of the disease for example a hotel employee who witnesses a gory suicide a female police officer whose career ending crash in her patrol car brings back traumatic memories from childhood and Vietnam combat veterans with recurrent posttraumatic nightmares Each vignette offers details of the dream revision method along with clinical tips for ensuring its success The final chapter features descriptions of brain mechanisms of PTSD and dream revision **If Someone Speaks, It Gets Lighter** Lynda Share,2013-04-15 Can a newborn infant accurately record traumatic experience Can early traumas be retained in memory How would such traumatic memories affect later development Where should we look for evidence of such traumas in adult patients *If Someone Speaks It Gets Lighter* provides surprising answers to these questions Taking as her point of departure both her own clinical experience and case reports in the analytic literature Lynda Share provides a thorough at times revelatory examination of the basic issues She proposes that the controversy between narrative and historical truth be redefined in terms of the distinctly different memory systems involved and in terms of the special mechanisms whereby trauma as opposed to ordinary expectable experience becomes a major unconscious organizer of behavior and memory Then winding her way skillfully through contemporary debates about the limits of reconstruction she argues persuasively that the impact of early infantile trauma can become accessible through disciplined analytic inquiry Indeed for Share to forego the possibility of reconstructing such traumas in favor of an exclusively here and now interpretive approach is to risk perpetuating the trauma in all its pathogenicity By contrast when trauma can be reexperienced meaningfully in treatment both behavioral reenactments and trauma related transference issues can be dramatically clarified Demonstrating her point with vivid clinical case reports Share emphasizes the special value of dream interpretation in recovering the full psychological impact of events that occurred in the first few years of life Through the imagistic dimension of dream formation unconscious

incorporating experiences into memory systems Rather than being a random process it is guided by the emotional concerns of the dreamer and this creates meaning for those memories Dreams such as being swept away in a tsunami often come after trauma and are considered paradigmatic of this process The theory states that thoughts are on a continuum with focused rational and over learned processing at one end and dreaming at the other The dreaming end is hyperconnective allowing for information to be weaved in broadly The current research was interested in testing several tenets of this theory especially the notion of trauma affecting the imagery of dreams It looked at the means by which imagery is measured the Central Imagery Scale to see how well it held together and how it relates to trauma symptoms Those interested in dreams in general would find this work interesting as it goes into some of the more fundamental aspects of the science of dreaming An Interpretation of Peter Kien's Dreams in Elias Canetti's "Auto Da Fé".
