Assessing Adolescent and Adult Intelligence Alan S. Kaufman, Elizabeth O. Lichtenberger, 2005-08-05 The classic text now updated with a new interpretive approach to the WAIS III Assessing Adolescent and Adult Intelligence the classic text from Alan Kaufman and Elizabeth Lichtenberger has consistently provided the most comprehensive source of information on cognitive assessment of adults and adolescents The newly updated Third Edition provides important enhancements and additions that highlight the latest research and interpretive methods for the WAIS III Augmenting the traditional sequential and simultaneous WAIS III interpretive methods the authors present a new approach derived from Cattell Horn Carroll CHC theory This approach combines normative assessment performance relative to age peers with ipsative assessment performance relative to the person's own mean level Following Flanagan and Kaufman's work to develop a similar CHC approach for the WISC IV Kaufman and Lichtenberger have applied this system to the WAIS III profile of scores along with integrating recent WAIS III literature Four appendices present the new method in depth In addition to a detailed description the authors provide a blank interpretive worksheet to help examiners make the calculations and decisions needed for applying

the additional steps of the new system and norms tables for the new WAIS III subtest combinations added in this approach. Assessing Adolescent and Adult Intelligence remains the premier resource for the field covering not only the WAIS III but also the WJ III, the KAIT and several brief measures of intelligence as well as laying out a relevant up to date discussion of the discipline. The new theory based interpretive approach for the WAIS III makes this a vital resource for practicing psychologists as well as a comprehensive text for graduate students.

Clinical Interpretation of the WAIS-III and WMS-III
David S. Tulsky, Donald H. Saklofske, Gordon J. Chelune, Robert K. Heaton, Robert J. Ivnik, Robert Bornstein, Aurelio Prifitera, Mark F. Ledbetter, 2003-10-27

This guide to the WAIS III and WMS III tests is written to help clinical practitioners achieve efficient and accurate interpretations of test results. The only interpretive guide to be based on data obtained while standardizing the tests, this reference source provides new models for interpreting results as well as practical information on the diagnostic validity, demographically corrected norms and accuracy of the tests in measuring intelligence and memory. The focus of information is to allow clinicians to reduce variance in the interpretations of scores indicating how best to factor in socio economic status of respondents, interpreting meaningful change in serial assessments and scoring with alternate or omitted sub tests. Also included in the book are chapters on accommodating clients with disabilities. The final chapter discusses frequently asked questions with answers on the use and interpretation of the tests as well as practical issues to help make scoring time efficient and accurate. Only guide to be based on data obtained in the standardization of the tests. Practical examples given to help guide interpretation of scores. Focuses on information to make faster more accurate scoring interpretations.

Clinical Assessment of Child and Adolescent Intelligence
Randy W. Kamphaus, 2019-06-11

This volume now in its second edition has been completely updated to provide the most comprehensive and accessible handbook of practices and tools for the clinical assessment of child and adolescent intelligence. Designed specifically as a teaching tool, it provides students with an accessible guide to interpretation and applies the same interpretive systems across many tests. It emphasizes the proper interpretation of intelligence tests within the context of a child's life circumstances and includes several devices to enhance the logical processes of assessment beginning with test selection and concluding with the reporting of results. In addition, *Clinical Assessment of Child and Adolescent Intelligence* stresses the importance of the interpretive process over the value of specific tests. Fosters a deeper understanding of the intelligence construct. Emphasizes learning by example using valuable case studies and vignettes designed to provide students with concrete models to emulate. This edition covers all facets of intelligence testing including detailed explanations of test interpretation theory, research and the full range of testing options for preschoolers through adult clients. New chapters have been introduced on neuropsychological approaches, adolescent and adult intelligence including coverage of WAIS III and KAIT and achievement and intelligence screeners have been added. And although designed primarily as a text for beginning graduate students, the book is also useful as a refresher for clinicians who are looking for updated assessment information.
