Waldens Shore Henry David Thoreau And Nineteenth Century Science:

Walden's Shore Robert M. Thorson, 2014-01-06 Walden's Shore explores Thoreau's understanding of the living rock on which life's complexity depends not as metaphor but as physical science Robert Thorson's subject is Thoreau the rock and mineral collector interpreter of landscapes and field scientist whose compass and measuring stick were as important to him as his plant press *Seeing New Worlds* Laura Dassow Walls, 1995-11-01 Thoreau was a poet a naturalist a major American writer Was he also a scientist He was Laura Dassow Walls suggests Her book the first to consider Thoreau as a serious and committed scientist will change the way we understand his accomplishment and the place of science in American culture Walls reveals that the scientific texts of Thoreau's day deeply influenced his best work from Walden to the Journal to the late natural history essays Here we see how just when literature and science were splitting into the two cultures we know now Thoreau attempted to heal the growing rift Walls shows how his commitment to Alexander von Humboldt's scientific approach resulted in not only his marriage of poetry and science but also his distinctively patterned nature studies In the first critical study of his *The Dispersion of Seeds* since its publication in 1993 she exposes evidence that Thoreau was using Darwinian modes of reasoning years before the appearance of *Origin of Species* This book offers a powerful argument against the critical tradition that opposes a dry mechanistic science to a warm organic Romanticism Instead Thoreau's experience reveals the complex interaction between Romanticism and the dynamic law seeking science of its day Drawing on recent work in the theory and philosophy of science as well as literary history and theory *Seeing New Worlds* bridges today's two cultures in hopes of stimulating a fuller consideration of representations of nature **Walden's Shore** Robert M. Thorson, 2014-01-06 Walden's Shore explores Thoreau's understanding of the living rock on which life's complexity depends not as metaphor but as physical science Robert Thorson's subject is Thoreau the rock and mineral collector interpreter of landscapes and field scientist whose compass and measuring stick were as important to him as his plant press *Nineteenth Century Prose*, 2019 *Henry David Thoreau* Laura Dassow Walls, 2017-06-30 This acclaimed biography captures the inspiring life and philosophy of an influential American thinker a moving portrait of a brilliant complex man The New York Times Henry David Thoreau's attempt to live deliberately in the woods outside his hometown of Concord Massachusetts has inspired individualists since the publication of *Walden* in 1854 But there was much more to Thoreau than his brief experiment in living at Walden Pond A member of the intellectual circle centered on his neighbor Ralph Waldo Emerson he was also an ardent naturalist a manual laborer and inventor a radical political activist and more In this acclaimed biography Laura Dassow Walls goes further than any previous Thoreau scholar to capture the man in all his profound inspiring complexity Walls traces the full arc of Thoreau's life beginning with his early days in the intellectual hothouse of Concord when the American experiment was a family affair earned by one generation and about to pass to the next By the time he died in 1862 at only forty four years of age Thoreau had witnessed the transformation of his world from a community of

farmers and artisans into a bustling interconnected commercial nation Drawing on Thoreau s published and unpublished writings Walls presents Thoreau in all his vigor quirks and contradictions the young man shattered by the sudden death of his brother the ambitious Harvard College student the ecstatic visionary who closed Walden with an account of the regenerative power of the Cosmos We meet the man whose belief in human freedom made him an uncompromising abolitionist and the passionate naturalist who long before the age of environmentalism saw tragedy for future generations in the human heedlessness around him

Dispersion Branka Arsic,2021-07-29 Plants are silent still or move slowly we do not have the sense that they accompany us or even perceive us But is there something that plants are telling us Is there something about how they live and connect how they relate to the world and other plants that can teach us about ecological thinking about ethics and politics Grounded in Thoreau s ecology and in contemporary plant studies Dispersion Thoreau and Vegetal Thought offers answers to those questions by pondering such concepts as co dependence the continuity of life forms relationality cohabitation porousness fragility the openness of beings to incessant modification by other beings and phenomena patience waiting slowness and receptivity

Henry David Thoreau Lawrence Buell,2025 When I wrote the following pages or rather the bulk of them I lived alone in the woods a mile from any neighbor in a house which I had built myself on the shore of Walden Pond Henry David Thoreau 1817 1862 was a leading figure in the American Transcendentalist movement and the era of U S literary emergence an intellectual with worldwide influence as essayist social thinker naturalist environmentalist and sage Thoreau s Walden an autobiographical narrative of his two year sojourn in a self built lakeside cabin is one of the most widely studied works of American literature It has generated scores of literary imitations and thousands of neo Walden experiments in back to basics living both rural and urban Thoreau s great essay Civil Disobedience is a classic of American political activism and a model for nonviolent reform movements around the world Thoreau also stands as an icon of modern American environmentalism the father of American nature writing a forerunner of modern ecology and a harbinger of freelance spirituality combining the wisdom of west and east Thoreau is also a controversial figure From his day to ours he has provoked sharply opposite reactions ranging from reverence to dismissal Scholars have regularly offered conflicting assessments of the significance of his work the evolution of his thought even the facts of his life Some disagreements are in the eye of the beholder but many follow from challenges posed by his own cross grained idiosyncrasies He was an advocate for individual self sufficiency who never broke away from home a self professed mystic now also acclaimed as a pioneer natural and applied scientist and a seminal theorist of nonviolent protest who defended the most notorious guerrilla fighter of his day All told he remains a rather enigmatic figure both despite and because we know so much about him beginning with the two million word journal he kept throughout his adult life The esteemed Thoreau scholar Lawrence Buell gives due consideration to all these aspects of Thoreau s art and thought framing key issues and complexities in historical and literary context

Learning from Thoreau Andrew Menard,2018-05-01 Learning from Thoreau is an

intimate intellectual walk with America's most edgy and original environmentalist. The thrust of the book consists not in learning about Thoreau from an intermediary but as the title suggests in learning from Thoreau along with the author whose lifelong engagement with this genius of the natural world leads him to examine the process of learning from an admired model. Using both images and text, Andrew Menard offers a personal meditation on Thoreau's thought, its originality and its influence on the modern environmental movement. He places Thoreau in dialogue with contemporary artists and thinkers and associates him with a rich variety of places: Walden Pond, the Museum of Modern Art, the Rockefeller State Park Preserve in upstate New York, Mormon Mesa northeast of Las Vegas, and the old town of Kongsberg, Prussia. Each place, each experience, each writer, and each work of art provides a different line of approach. The author also leads us through an expanding and deepening series of keywords that trigger fresh occasions to learn from Thoreau: Concord, Walden, walking, seeing, nature, wildness, beauty. The result is a deeply nuanced and informed portrait of Thoreau's inner and outer landscape. Excursions with Thoreau Edward F. Mooney, 2015-10-22. Excursions with Thoreau is a major new exploration of Thoreau's writing and thought that is philosophical yet sensitive to the literary and religious. Edward F. Mooney's excursions through passages from Walden, Cape Cod, and his late essay "Walking" reveal Thoreau as a miraculous writer, artist, and religious adept. Of course, Thoreau remains the familiar political activist and environmental philosopher, but in these fifteen excursions we discover new terrain. Among the notable themes that emerge are Thoreau's grappling with underlying affliction, his pursuit of wonder as ameliorating affliction, his use of the enigmatic image of a child of the mist, his exalting sympathy with intelligence over plain knowledge, and his preferring befitting reverie not argument as the way to be carried to better, cleaner perceptions of reality. Mooney's aim is to bring alive Thoreau's moments of reverie and insight and to frame his philosophy as poetic and episodic rather than discursive and systematic.

Ecological Restoration and the U.S. Nature and Environmental Writing Tradition Laura Smith, 2022-01-12. This book presents a critical history of the intersections between American environmental literature and ecological restoration policy and practice. Through a storytelling, restorying, restoring framework, this book explores how entanglements between writers and places have produced literary interventions in restoration politics. The book considers the ways literary landscapes are politicized by writers themselves and by conservationists, activists, policymakers, and others in defense of U.S. public lands and the idea of wilderness. The book profiles five environmental writers and examines how their writings on nature, wildness, wilderness, conservation, preservation, and restoration have variously inspired and been translated into ecological restoration programs and campaigns by environmental organizations. The featured authors are Henry David Thoreau (1817-1862) at Walden Pond; John Muir (1838-1914) in Yosemite National Park; Aldo Leopold (1887-1948) at his family's Wisconsin sand farm; Marjory Stoneman Douglas (1890-1998) in the Everglades; and Edward Abbey (1927-1989) in Glen Canyon. This book combines environmental history, literature, biography, philosophy, and politics in a commentary on considering and developing environmental literature's place in conversations on restoration ecology.

ecological restoration and rewilding

Eventually, you will no question discover a new experience and skill by spending more cash. nevertheless when? reach you how to that you require to acquire those every needs considering having significantly cash? Why dont you try to acquire something basic in the beginning? Thats something that will lead you to understand even more regarding the globe, experience, some places, with history, amusement, and a lot more?
