Wall Street Capitalism The Theory Of The Bondholding Class:

Wall Street Capitalism E. Ray Canterbury, 2000 Breaking the chains of the bond market This book goes behind the headlines of the Wall Street Journal to unmask the bondholding class Insulated from criticism by a self serving ideology the bondholders have redefined the indicators of economic well being decidedly in Wall Street s favor Created out of the fiscal folly of Reaganomics fortified by Federal Reserve officials and patronized by the Clinton Administration the bondholding class invented the Goldilocks economy never too hot never too cold As this powerful class has amassed the greatest wealth in history ordinary Americans have been losing ground to the ensuing global financial turbulence In a tour de force Ray Canterbury shows how the evaporation of personal savings the Angels share is as necessary to Wall Street capitalism as it is damaging to growth and wages on Main Street Wall Street Capitalism: The Theory Of The Bondholding Class E Ray Canterbury, 2000-02-18 Breaking the chains of the bond market This book goes behind the headlines of the Wall Street Journal to unmask the bondholding class Insulated from criticism by a self serving ideology the bondholders have redefined the indicators of economic well being decidedly in Wall Street s favor Created out of the fiscal folly of Reaganomics fortified by Federal Reserve officials and patronized by the Clinton Administration the bondholding class invented the Goldilocks economy never too hot never too cold As this powerful class has amassed the greatest wealth in history ordinary Americans have been losing ground to the ensuing global financial turbulence In a tour de force Ray Canterbury shows how the evaporation of personal savings the Angels share is as necessary to Wall Street capitalism as it is damaging to growth and wages on Main Street Inequality And Global Supra-surplus Capitalism E Ray Canterbury, 2018-01-18 This book is written as a sequel to John Kenneth Galbraith s The Affluent Society and provides a theoretical framework for the first time for supra surplus capitalism Conventional economics has the income and wealth distributions as givens This assumption immediately excludes such distributions from economic and social concern Occasionally economists such as Kenneth Boulding and even earlier Michal Kalecki have attempted to develop alternative perspectives in which such distributions are integral to the story and therefore have implications for public policy At the same time conventional microeconomics is a theory of price only in which economic efficiency in an engineering sense is the only value to be optimized The income or wealth distributions are given as constraints Mathematically the constraints thereafter become invisible they have no further role to play The choices that are presumed to be made are neither inhibited nor facilitated by a household s position in the income or wealth distributions This volume will explore problems with conventional theory and policy but its main thrust comprises a theory of supra surplus capitalism applicable to both developed and developing countries and its relation to inequalities worldwide Making Of Economics, The (4th Edition) - Vol Iii: The Radical Assault E Ray Canterbury, 2009-12-14 This book is the first in the field to cover exclusively the modern radical economists Science has always had its radicals economics is unexceptional in this regard The book begins with the persona of Karl Marx and his

soulmate Friedrich Engels the most radical of all continuing with the central ideas of Marx including his theory of capitalism and an understanding of why in Marx's view capitalism is doomed Thereafter Thorstein Veblen fills the role as the USA radical who founded the only uniquely American school of economics the institutionalist school This is followed by Joseph Schumpeter and his theory of capitalist motion According to Schumpeter the demise of capitalism is self-inflicted through creative destruction The bestselling authors Robert Heilbroner and John Kenneth Galbraith straddle both the institutionalist and Post Keynesian schools The new left radicals emanated from Galbraith's Harvard University and are still around today The heyday of the new right came during the administration of Ronald Reagan and was led by the neo Austrians Finally the book concludes by analyzing the Post Keynesians claim to be the legitimate heirs to Keynesianism Thus far they fall into the radical camp This book is also available as a **A Brief History of Economics** E. Ray Canterbury,2011 Canterbury's unique style of presentation and breadth of vision manages to breathe new life into the study of dead economists Really helps the reader conjure up a vision of the economic times A fine addition to the history of thought literature Journal of Economic Issues **Imperialism, Crisis and Class Struggle** Henry Veltmeyer,2010 This book of essays written in honour of James Petras address some of the most critical issues of our time those of imperialism crisis and class struggle These issues allow the authors to identify both the enduring verities and contemporary face of capitalism and Petras contributions

Property in Contemporary Capitalism Paddy Ireland,2024-07-31 Amid the shift towards neoliberalism and the privatization of resources this book provides a radical new lens to view property and property theory Boldly challenging the conventional theories of property law that have shaped our understanding for centuries leading expert Paddy Ireland explores the rise and growth of new intangible property forms the nature of investment and of property as capital and the empirical realities of modern property Raising broader questions about ownership in society the author ignites a powerful conversation about the increasingly unequal distribution of wealth forcing us to confront that our current property system bears considerable responsibility for the current polycrisis This groundbreaking work will set the agenda for a new era in property theory **The Dual State** Eric Wilson,2016-03-23 This volume presents a practical demonstration of the relevance of Carl Schmitt's thought to parapolitical studies arguing that his constitutional theory is the one best suited to investing the deep state with intellectual and doctrinal coherence Critiquing Schmitt's work from a variety of intellectual perspectives the chapters discuss current parapolitical reality within the domain of criminology the parapolitical nature of both the dual state and the national security state corporate complex Using the USA as a prime example of the world's current dual or deep political state the criminogenic dimensions of the parapolitical systems of post 9/11 America are discussed Using case studies the dual state is examined as the causal factor of inexplicable parapolitical events within both the developed and developing world including Sweden Canada Italy Turkey and Africa *The Global Great Recession* E. Ray Canterbury,2011 Provides an account of the Great Recession of 2007-2010 This title presents an output employment framework for evaluating the Great

Recession It includes a chapter on the Great Depression that provides a basis for comparison while outlining the institutions still intact that moderated that downturn **Why We Can't Afford the Rich** Andrew Sayer, 2015-11-11 As inequalities widen and the effects of austerity deepen in many countries the wealth of the rich has soared Why we can't afford the rich exposes the unjust and dysfunctional mechanisms that allow the top 1% to siphon off wealth produced by others through the control of property and money Leading social scientist Andrew Sayer shows how the rich worldwide have increased their ability to create indebtedness and expand their political influence Winner of the 2015 British Academy Peter Townsend Prize this important book bursts the myth of the rich as specially talented wealth creators It shows how the rich are threatening the planet by banking on unsustainable growth The paperback includes a new Afterword updating developments in the last year and forcefully argues that the crises of economy and climate can only be resolved by radical change to make economies sustainable fair and conducive to well being for all
