In particular the contributions of some theorists and scholars of Vygotskian thought presented at the Symposium *The Zone of Proximal Development ZPD in the School Education and Clinical Practice* are collected here. Therefore the collection edited here resulted from an enriching and constructive international meeting that saw the profitable synergy between scholars of different countries involved in research expanding a multicultural approach to psycho-pedagogical development and learning. The edition of the present volume represents to the editor the opportunity to synthesise the state of historical-cultural psychology mainly when applied in clinical and didactical fields. Thanks to Sapienza's funding for international agreements the publication of these proceedings allows for a broad in-depth analysis and prospective analysis of the historical-cultural approach proposed by L. S. Vygotskij, a thinker to be appreciated not simply as a semiologist but as a fighter for freedom and overall inclusion in the frame of values of social justice and equality. It is an ambitious attempt, a message to all scholars, colleagues and students engaged in education and psycho-social interventions.

Handbook of Research on Learner-Centered Approaches to Teaching in an Age of Transformational Change Bromer, Billi L., Crawford, Caroline M., 2022-06-24 Institutions of education are in an age of transformational change in which learning has a wider scope of understanding and long-term impact than ever before. Those involved in teaching and learning require additional training and subject-matter support towards developing a broader and more profoundly complex understanding of the learners affected by evolving sociological events and associated needs. More than ever a broader understanding of the learner is needed inclusive of a learner-centered approach to both teaching and learner cognitive engagement. The *Handbook of Research on Learner-Centered Approaches to Teaching in an Age of Transformational Change* examines the abundant transformational changes that have occurred and provide strategies to understand and address them. It draws from a wide range of experts and provides a burgeoning understanding of the effects of these rapidly moving transformational changes that are occurring in the processes of teaching and learning. Exploring a wide range of issues such as community engagement, scholarship, motivation, driven assignment design and trauma-informed practices, this major reference work is an invaluable resource for educators of K-12 and higher education, educational faculty and administration, pre-service teachers, government officials, non-profit organizations, sociologists, libraries, researchers and academicians.

CHANGE: MODELS AND PROCESSES Shawn Cooper, 2012-11-01 This book is intended to assist individuals in dealing with change occurring externally to the person as well as change that the individual attempts to bring about in themselves. The approaches taken attempt to organize the concepts of change within a broad framework, a continuum or gradient which will enable the person to see changes in life as existing on a spectrum.

from those change phenomena which are external to the individual e g economic or environmental events to those within the person e g stopping smoking or changing one s behavior Within an overarching framework of general systems theory which emphasizes a holistic view of change the book describes a number of conceptual structures or what are conceived as models The volume focuses on helping the reader to recognize the way these models appear in the person s environment as well as in the individual s own functioning Further the book indicates how the person can apply these models in his or her own efforts to deal with life and change Thus each chapter describes the essential idea of a particular model and then provides a section on the applications of that model The beginning chapters describe several abstract models followed by a chapter which presents John Bowlby s attachment theory and his concept of internal models which reflect individuals core perceptions of themselves and others finally the book includes a discussion of James Prochaska s stages of change model which describes the ways in which individuals proceed to make changes in their own behavior and functioning The book presents a unified view of change in life as it occurs external to and within the person and concludes with a discussion of ways the individual can consider these various concepts in efforts to make change The book is appropriate for three audiences First the volume is suitable for mental health professionals for whom the book can provide a unique view of the change process in the treatment they offer and they might request that their patients read the book Second the book is relevant for individuals interested in a process of self change whether they are contemplating or are in a psychotherapeutic relationship or simply want to make changes in themselves on their own Third the book is also relevant for managers in organizations who deal with the concepts of change in the individuals they supervise
