Wages Of Destruction By Adam Tooze July 31 2007:

Hitler's Atomic Bomb Mark Walker, 2024-07-18 Who were the German scientists who worked on atomic bombs during World War II for Hitler's regime How did they justify themselves afterwards Examining the global influence of the German uranium project and postwar reactions to the scientists involved Mark Walker explores the narratives surrounding Hitler's bomb The global impacts of this project were cataclysmic Credible reports of German developments spurred the American Manhattan Project the nuclear attacks on Hiroshima and Nagasaki and in turn the Soviet efforts After the war these scientists' work was overshadowed by the twin shocks of Auschwitz and Hiroshima Hitler's Atomic Bomb sheds light on the postwar criticism and subsequent rehabilitation of the German scientists including the controversial legend of Werner Heisenberg and Carl Friedrich von Weizsäcker's visit to occupied Copenhagen in 1941 This scientifically accurate but non-technical history examines the impact of German efforts to harness nuclear fission and the surrounding debates and legends

The Greater Second World War Andrew N. Buchanan, Ruth Lawlor, 2025-04-15 The Greater Second World War challenges the traditional temporal and geographic frameworks of World War II expanding the timeline to include a series of regional conflicts and revolutions that began in 1931 and continued into the mid 1950s These conflicts bookended a central paroxysm defined by the intervention of the United States into every theater of the war rendering it genuinely global The essays within this volume bring top level accounts of US European and Axis strategic maneuvering into conversation with social histories of bottom up agency in ways that destabilize conventional narratives Working with novel and overlapping scales of time and space and attuned to ongoing and lively debates about the place of the nation state in global history after 1945 the scholars featured in The Greater Second World War seek to not only describe the war's beginnings in Asia and Africa rather than in Europe but also trace its ends to the shatter zones of the Soviet frontier the struggles for sovereignty in contested spaces and the long reaches of US imperialism well into the late twentieth century Together their contributions reveal how the cascading imperial and economic crises of the mid twentieth century triggered a series of discrete local and regional struggles that took on the character of a singular unified world war after the entry of the United States into every theater and almost every corner of the world Contributors Marco Maria Aterrano Th W Bottelier Pablo del Hierro Alexandre Fortes Kelly A Hammond Ashley Jackson Naina Manjrekar David Motadel Tejasvi Nagaraja Martin Thomas

Jewish Art in Nazi Germany Dana Smith, 2022-03-27 This book provides a social and cultural history of Jewish art in Nazi Germany with a focus on the Jewish artists art critics and audiences in Nazi Bavaria From the time of its conceptualization in the autumn of 1933 until its final curtain call in November 1938 the Jewish Cultural League in Bavaria sustained three departments music visual arts and adult education The Bavarian example steps outside the highly professional cultural milieu of Jewish Berlin and instead looks at relatively unknown efforts of Bavarian Jewish artists as they used art to define what it now meant to them to be Jewish under Nazism Insightful and engaging this book is ideal for advanced undergraduate students graduate

students and scholars interested in social and cultural histories of Jews in Germany

Mutant Neoliberalism William Callison, Zachary Manfredi, 2019-11-05 Tales of neoliberalism's death are serially overstated Following the financial crisis of 2008 neoliberalism was proclaimed a zombie a disgraced ideology that staggered on like an undead monster After the political ruptures of 2016 commentators were quick to announce the end of neoliberalism yet again pointing to both the global rise of far right forces and the reinvigoration of democratic socialist politics But do new political forces sound neoliberalism's death knell or will they instead catalyze new mutations in its dynamic development Mutant Neoliberalism brings together leading scholars of neoliberalism political theorists historians philosophers anthropologists and sociologists to rethink transformations in market rule and their relation to ongoing political ruptures The chapters show how years of neoliberal governance policy and depoliticization created the conditions for thriving reactionary forces while also reflecting on whether recent trends will challenge reconfigure or extend neoliberalism's reach The contributors reconsider neoliberalism's relationship with its assumed adversaries and map mutations in financialized capitalism and governance across time and space from Europe and the United States to China and India Taken together the volume recasts the stakes of contemporary debate and reorients critique and resistance within a rapidly changing landscape Contributors: Sren Balibar Sren Brandes Wendy Brown Melinda Cooper Julia Elyachar Michel Feher Megan Moodie Christopher Newfield Dieter Plehwe Lisa Rofel Leslie Salzinger Quinn Slobodian

Hitler's Charisma Laurence Rees, 2013-04-16 Fuelled by hate incapable of forming normal human relationships unwilling to listen to dissenting voices Adolf Hitler seemed an unlikely leader and yet he commanded enormous support and was able to exert a powerful influence over those who encountered him How did Hitler become such an attractive figure to millions of people That is the question at the core of *Hitler's Charisma* Acclaimed historian and documentary filmmaker Laurence Rees examines the nature of Hitler's appeal and reveals the role his supposed charisma played in his success Here is a fascinating social psychological and historical investigation into the formation of a personality whose determination and vision would at the outset convince a small group of like minded political and social outcasts but would eventually win over an entire nation and plunge the rest of the world into a cataclysm unlike any that had ever been seen before *Hitler's Charisma* is a natural culmination of twenty years of writing and research on the Third Reich and a remarkable examination of the man and the mind at the heart of it all With 16 pages of black and white illustrations

The End is Nigh Robert Crowcroft, 2019 The tale of the relentless intrigue burning ambition and bitter rivalry in British politics during the years preceding the Second World War exploring the interaction between Westminster and a world primed to explode

Female SS Guards and Workaday Violence Elissa Mailänder, 2015-03-01 How did ordinary women like their male counterparts become capable of brutal violence during the Holocaust Cultural historian Elissa Mailänder examines the daily work of twenty eight women employed by the SS to oversee prisoners in the concentration and death camp Majdanek Lublin in Poland Many female SS overseers in Majdanek perpetrated violence and terrorized prisoners not

only when ordered to do so but also on their own initiative The social order of the concentration camp combined with individual propensities shaped a microcosm in which violence became endemic to workaday life The author's analysis of Nazi records court testimony memoirs and film interviews illuminates the guards social backgrounds careers and motives as well as their day to day behavior during free time and on the job as they supervised prisoners on work detail and in the cell blocks conducted roll calls and selected girls and women for death in the gas chambers Scrutinizing interactions and conflicts among female guards relations with male colleagues and superiors and internal hierarchies Female SS Guards and Workaday Violence shows how work routines pressure to resolve problems material gratification and Nazi propaganda stressing guards roles in creating a new order heightened female overseers identification with Nazi policies and radicalized their behavior

Second Front Marc Milner, 2025-04-22 A revelatory new account of the Second World War and how bitter competition between the Allies would shape the postwar world In June 1944 an Allied army of British American and Canadian troops sought to open up a Second Front in Normandy But they were not only fighting to bring the Second World War to an end After decades of Anglo American struggle for dominance they were also contending with one another to determine who would ascend to global hegemony once Hitler's armies fell Marc Milner traces this bitter rivalry as it emerged after the First World War and evolved during the fragile peace which led to the Second American media and domestic politics dominated the Allied powers military strategy overshadowing the contributions of Britain and the remarkably critical role played by Canada in establishing this Second Front Culminating in the decisive Normandy campaign Milner shows how the struggle for supremacy between Churchill and Roosevelt changed the course of the Second World War and how their rivalry shaped our understanding of the Normandy campaign and the war itself

Concentration Camps Alan Kramer, 2025-03-26 A global and comprehensive history of a modern institution of inhumanity In popular perception concentration camps are synonymous with genocide and Nazi racial extermination Yet concentration camps were and are a global phenomenon not restricted to Nazi Germany used at times even by democracies with an astonishing range of functions Drawing together a wide range of multi lingual archival research and synthesising a broad secondary literature Alan Kramer provides here a comprehensive history of concentration camps charting their first establishment at the beginning of the twentieth century on the colonial periphery through their most extreme and inhuman instances in the mid twentieth century to their continued use today Concentration camps are shown to be a truly transnational phenomenon that emerged both simultaneously within and between imperial spheres Britain Spain the USA and Germany around 1900 and diachronically from then to the First World War the Gulag and Nazi camps Such camps existed and exist under a variety of regimes often concomitant with empire building by revolutionary dictatorships as sites of genocide mass murder and performative violence but also as central elements of utopian schemes of social and racial transformation Integrating the perspective of perpetrators and the victims and contextualising them within the historiography of other carceral institutions the book will reshape the way we think

about concentration camps as part of modern civilization past and present
