Wagner Basic Architecture:

Otto Wagner August Sarnitz, Peter Gössel, 2005 Relations in Architecture August Sarnitz, 2020-05-05 The title of the book sets the two fields of activity pursued by the architect architectural historian and theorist August Sarnitz building and writing in a reciprocal relation the context to what has been built emerges in the process of writing just as the context to what has been written emerges in the process of building The structure of the book follows precisely this reciprocity an essay about architectural history and Big Data is followed by three on the topics of urban development social housing and the fiction of space A number of influential Viennese architects appear as well Frank Kiesler Hollein and Prix The topics of housing design and furniture are all illustrated with Sarnitz's own projects the end of the book is dedicated to architectural photography which is especially important to Sarnitz in his capacity as publicist The richly illustrated book is the first to document Sarnitz's work as author designer exhibition designer architect and photographer *Otto Wagner* Harry Mallgrave, 1996-07-11 These essays explore the parameters of Wagner's rich literary and architectural creations

Nietzsche and Architecture Lucy Huskinson, 2024-07-25 Nietzsche and Architecture explores Nietzsche's relationship to the architect's buildings and modern architectural movements he went on to inspire and situates his philosophy more appropriately and comprehensively within the field of architectural studies architectural history and theory Divided into two parts the book first examines Nietzsche's philosophy of architecture exploring his notions of rhythm ornament style and power It then goes on to examine Nietzsche's ambiguous architectural legacy scrutinising iconic architects thinkers designs and cultural movements to ascertain their relationship with Nietzschean ideas from the crystal architecture of Bruno Taut and Peter Behrens to the new styles of the Bauhaus and Le Corbusier Louis H Sullivan's desire for the heights and the cultural propaganda of Nazi architecture Clearly explaining the subtleties and complexities of Nietzsche's architectural thought Nietzsche and Architecture provides an accessible insight into Nietzsche's philosophy and its significance to the development of modern architecture in the 19th and early 20th centuries shedding vital light on the continued relevance of Nietzsche to architecture today *Modern Architecture* Otto Wagner, 1988 In 1896 Otto Wagner's *Modern Architecture* shocked the European architectural community with its impassioned plea for an end to eclecticism and for a modern style suited to contemporary needs and ideals utilizing the nascent constructional technologies and materials Through the combined forces of his polemical pedagogical and professional efforts this determined newly appointed professor at the Vienna Academy of Fine Arts emerged in the late 1890s along with such contemporaries as Charles Rennie Mackintosh in Glasgow and Louis Sullivan in Chicago as one of the leaders of the revolution soon to be identified as the Modern Movement Wagner's historic manifesto is now presented in a new English translation the first in almost ninety years based on the expanded 1902 text and noting emendations made to the 1896 1898 and 1914 editions In his introduction Dr Harry Mallgrave examines Wagner's tract against the backdrop of nineteenth century theory critically exploring the affinities of

Wagner's revolutionary plan with the German eclectic debate of the 1840s the materialistic tendencies of the 1870s and 1880s and the emerging cultural ideology of modernity Modern Architecture is one of those rare works in the literature of architecture that not only proclaimed the dawning of a new era but also perspicaciously and cogently shaped the issues and the course of its development it defined less the personal aspirations of one individual and more the collective hopes and dreams of a generation facing the sanguine promise of a new century The Architecture of Red Vienna, 1919-1934 Eve Blau, 1999 Encyclopedic in its coverage this seminal work focuses on the architecture of Prague from the turn of the century to the end of the Second World War a rich matrix within which to place the figures who created the powerful innovative spirits of modern Czech architecture The book documents the architects structures and theoretical underpinnings that helped to shape Prague's cultural heritage and present day artistic spirit The Architecture of Phantasmagoria Libero Andreotti, Nadir Lahiji, 2016-11-10 In a time of mass mediated modernity the city becomes almost by definition a constitutively mediated city Today more than ever before the omnipresence of media in every sphere of culture is creating a new urban ontology saturating fracturing and exacerbating the manifold experience of city life The authors describe this condition as one of hyper mediation a qualitatively new phase in the city's historical evolution The concept of phantasmagoria has pride of place in their study using it as an all embracing explanatory framework they explore its meanings as a critical category to understand the culture and the architecture of the contemporary city Andreotti and Lahiji argue that any account of architecture that does not include understanding the role and function of media and its impact on the city in the present tele technological capitalist society is fundamentally flawed and incomplete Their approach moves from Walter Benjamin through the concepts of phantasmagoria and of media as theorized also by Theodor Adorno Siegfried Kracauer and a new generation of contemporary critics towards a new socio critical and aesthetic analysis of the mediated space of the contemporary city Architects' Drawings Kendra Schank Smith, 2006-08-11 Sketches from prominent architects drawn from an international selection A unique insight into how architects use sketches to develop and transfer complex concepts into physical form enabling readers to improve the connection between their own ideas and designs Reveals the secrets of the most successful sketching techniques used by architects for today's designers *Architecture Re-assembled* Trevor Garnham, 2013-04-26 Beginning from the rise of modern history in the eighteenth century this book examines how changing ideas in the discipline of history itself has affected architecture from the beginning of modernity up to the present day It reflects upon history in order to encourage and assist the reader in finding well founded principles for architectural design This is not simply another history of architecture nor a history of histories Setting buildings in their contemporaneous ideas about history it spans from Fischer von Erlach to Venturi and Rossi and beyond to architects working in the fallout from both the Modern Movement Aalto Louis Kahn Aldo van Eyck and Post modernism such as Rafael Moneo and Peter Zumthor It shows how Soane Schinkel and Stirling amongst others made a meaningful use of history and contrasts this with how a

misreading of Hegel has led to an abuse of history and an uncritical flight to the future This is not an armchair history but a lively discussion of our place between past and future that promotes thinking for making

The Mental Life of the Architectural Historian Gevork Hartoonian, 2014-08-11 Starting with the question concerning the discursive formation of architectural history the chapters compiled in this book attempt to re read the historiography of early modern architecture from the point of view of the theoretical work produced since the post war era Central to the objectives of the argument are the ways in which firstly architectural history differs from the traditions of art history and secondly that the historical narrative works its autonomy through theoretical representation the discursive flow of which is interrupted by the historian's urge to support arguments with references to buildings texts drawings and historical events The historians discussed in this volume are those regularly addressed by most critics revisiting modern architectural history Individual chapters are dedicated to N Pevsner H R Hitchcock and S Giedion an economy of selection that is formative for a critical understanding of the canon established by these historians Themes such as periodization autonomy and time are discussed and the coda of the final chapter expands on the scope of critical historiography popularised by Kenneth Frampton and Manfredo Tafuri
