The Settlement of the American Continents C. Michael Barton, Geoffrey A. Clark, David R. Yesner, Georges A. Pearson, 2016-03-04 When many scholars are asked about early human settlement in the Americas they might point to a handful of archaeological sites as evidence Yet the process was not a simple one and today there is no consistent argument favoring a particular scenario for the peopling of the New World This book approaches the human settlement of the Americas from a biogeographical perspective in order to provide a better understanding of the mechanisms and consequences of this unique event It considers many of the questions that continue to surround the peopling of the Western Hemisphere focusing not on sites dates and artifacts but rather on theories and models that attempt to explain how the colonization occurred Unlike other studies this book draws on a wide range of disciplines archaeology human genetics and osteology linguistics ethnology and ecology to present the big picture of this migration Its wide ranging content considers who the Pleistocene settlers were and where they came from their likely routes of migration and the ecological role of these pioneers and the consequences of colonization Comprehensive in both geographic and topical coverage the contributions include an explanation of how the first inhabitants could have spread across North America within several centuries the most comprehensive review of new mitochondrial DNA and Y chromosome data relating to the colonization and a critique of recent linguistic theories Although the authors lean toward a conservative rather than an extreme chronology this volume goes beyond the simplistic emphasis on dating that has dominated the debate so far to a concern with late Pleistocene forager adaptations and how foragers may have coped with a wide range of environmental and ecological factors It offers

researchers in this exciting field the most complete summary of current knowledge and provides non specialists and general readers with new answers to the questions surrounding the origins of the first Americans

Clues to Lower Mississippi Valley Histories David V. Kaufman,2020-10-01 2019 Choice Outstanding Academic Title In Clues to Lower Mississippi Valley Histories David V Kaufman offers a stunning relational analysis of social cultural and linguistic change in the Lower Mississippi Valley from 500 to 1700 He charts how linguistic evidence aids the understanding of earlier cultural and social patterns traces the diaspora of indigenous peoples and uncovers instances of human migration Historical linguistics establishes evidence of contact between indigenous peoples in the linguistic record where other disciplinary approaches have obscured these connections The Mississippi Valley is the heartland of early North American civilizations a rich and diversified center of transportation for every part of eastern North America and to Mesoamerica The Lower Mississippi Valley region emerged as the home of the earliest mound building societies in the Americas and was home to some of the most impressive kingdoms encountered by Spanish and French explorers The languages of the region provide the key to the realities experienced by these indigenous peoples their histories and their relationships Clues to Lower Mississippi Valley Histories focuses on relationships that constitute what linguists call a sprachbund language union or language area Kaufman illuminates and articulates these linguistic relationships through a skillful examination of archaeological and ethnohistorical data Clues to Lower Mississippi Valley Histories examines the relationship between linguistics and archaeology to elucidate the early history of the Lower Mississippi Valley

An Archaeology of the Cosmos Timothy R. Pauketat,2013

An Archaeology of the Cosmos seeks answers to two fundamental questions of humanity and human history The first question concerns that which some use as a defining element of humanity religious beliefs Why do so many people believe in supreme beings and holy spirits The second question concerns changes in those beliefs What causes beliefs to change Using archaeological evidence gathered from ancient America especially case material from the Great Plains and the pre Columbian American Indian city of Cahokia Timothy Pauketat explores the logical consequences of these two fundamental questions Religious beliefs are not more resilient than other aspects of culture and society and people are not the only causes of historical change An Archaeology of the Cosmos examines the intimate association of agency and religion by studying how

relationships between people places and things were bundled together and positioned in ways that constituted the fields of human experience This rethinking theories of agency and religion provides readers with challenging and thought provoking conclusions that will lead them to reassess the way they approach the past
