Walking With The Great Apes:

Walking with the Great Apes Sy Montgomery, 2009-08-25 From the personal to the primate Sy Montgomery acclaimed author of *The Soul of an Octopus* and *The Good Good Pig* explores the science wisdom and living experience of three of the greatest scientists of the twentieth century Three astounding women scientists have in recent years penetrated the jungles of Africa and Borneo to observe nurture and defend humanity's closest cousins Jane Goodall has worked with the chimpanzees of Gombe for nearly 50 years Diane Fossey died in 1985 defending the mountain gorillas of Rwanda and Birutė Galdikas lives in intimate proximity to the orangutans of Borneo All three began their work as protégés of the great Anglo African archeologist Louis Leakey and each spent years in the field allowing the apes to become their familiars and ultimately waging battles to save them from extinction in the wild Their combined accomplishments have been mind blowing as Goodall Fossey and Galdikas forever changed how we think of our closest evolutionary relatives of ourselves and of how to conduct good science

The Madame Curie Complex Julie Des Jardins, 2010-10-06 Why are the fields of science and technology still considered to be predominantly male professions The Madame Curie Complex moves beyond the most common explanations limited access to professional training lack of resources exclusion from social networks of men to give historical context and unexpected revelations about women's contributions to the sciences Exploring the lives of Jane Goodall Rosalind Franklin Rosalyn Yalow Barbara McClintock Rachel Carson and the women of the Manhattan Project Julie Des Jardins considers their personal and professional stories in relation to their male counterparts Albert Einstein Robert Oppenheimer Enrico Fermi to demonstrate how the gendered culture of science molds the methods structure and experience of the work With lively anecdotes and vivid detail The Madame Curie Complex reveals how women scientists have often asked different questions used different methods come up with different explanations for phenomena in the natural world and how they have forever transformed a scientist's role
