Each chapter testifies that self-study and its ties to improvement through posing thoughtful questions, collecting and analyzing relevant data, and interrogating the interpretation of one's analysis of self are global and cross-disciplinary. This book is a must-read. Renée T. Clift, Professor and Associate Dean, University of Arizona, USA. [Constructivist Approaches and Research Methods](#) Pam Denicolo, Trevor Long, Kim Bradley-Cole, 2016-09-07. This book provides a comprehensive overview of personal construct psychology (PCP) that will help researchers understand the why's, what's, and how's of conducting a rigorous constructivist research project. From the theoretical underpinnings of constructivist approaches to the practical values of these techniques, these three expert authors explain how to conduct interpretative constructivist research from inception to completion. Key topics include: Understanding research philosophies and paradigms; Constructing and exploring personal realities; Establishing effective research procedures; Evaluating grids mapping narrative and other research methods; Managing the practicalities of fieldwork; Analysing and presenting data. With activities and procedural examples from a wide range of disciplines woven throughout the text and two special chapters featuring in-depth case studies from a variety of constructivist researchers, this book helps readers grasp the tools, designs, and opportunities of interpretative research. An essential companion for both researchers and practitioners looking to understand people's values, attitudes, beliefs, perceptions, or motivations. [Teaching International Law](#) Jean-Pierre Gaudi, Barrie Sander, 2024-06-26. The practice of teaching international law is conducted in a wide range of contexts across the world by a host of different actors, including scholars, practitioners, civil society groups, governments, and international organisations. This collection brings together a diversity of scholars and practitioners to share their experiences and critically reflect on current practices of teaching international law across different contexts, traditions, and perspectives to develop existing conversations and spark fresh ones concerning teaching practices within the field of international law. Reflecting on the responsibilities of teachers of international law to engage with and confront histories, contemporary crises, and everyday events in their teaching, the collection explores efforts to decenter the teacher and the law in the classroom, opportunities for dialogical and critical approaches to teaching, and the possibilities of co-producing non-conventional pedagogies that question the mainstream underpinnings of international law teaching. Focusing on the tools and techniques used to teach international law to date, the collection examines the teaching of international law in different contexts. Traversing a range of domestic and regional contexts around the world, the book offers insights into both the culture of teaching in particular domestic settings as well as the structural challenges and obstacles that arise in terms of who, what, and how international law is taught in practice. Offering a unique window into the personal experiences of a diversity of scholars and practitioners from around the world, this collection aims to nurture conversations about the responsibilities, approaches, opportunities, and challenges of teaching international law. **Nursing and Informatics for the 21st Century - Embracing a Digital World, Book 1** Connie
