African Security in the Anthropocene Hussein Solomon, Jude Cocodia, 2023-03-11 Much has been written on security in Africa its democratic deficit poor civil military relations and myriad conflicts but these are often treated in isolation from one another This book takes a different approach as it links all of these issues to the dynamics of the Anthropocene Penned by African scholars on the continent and in the diaspora it examines the different challenges not as separate entities but as outcomes of the Anthropocene Age In this geological epoch humans have become a global force unfortunately not necessarily for good The interaction between humans and the climate the effects of waste the impact of pollution on marine and terrestrial ecosystems the loss of biodiversity and the change in the chemical composition of the soil oceans and atmosphere are key identifiers of the age of the Anthropocene This has fueled conflict and instability from the vast swathes of the Sahel to Somalia Responding to these issues of insecurity without understanding their inter connectedness and how this relates to the environment can only result in failure From this perspective the current structures in place are inadequate for the task of confronting insecurity at the state and continental levels as represented by the African Union What is needed is a radical reevaluation of Africa's security architecture and approach to security This necessitates pooling sovereignty on a continental and global level It necessitates less state centric responses that include civil society and the business community as equal partners of states in order to collectively confront insecurity in the age of

the Anthropocene The authors are academics policy makers and military veterans who have worked in building capacity on the African continent The book is comprehensive in scope strong on theory pragmatic in policy and reflects experience from the field The authors approach makes the book easy interesting and intriguing Symposium Proceedings Innovative Teaching Practices Janina Morska,Alan Rogerson,2023-06-14 This volume contains the papers presented at the International Symposium Innovative Teaching Practices held on August 14 18 2023 in The Queen s College Oxford University The Symposium was organized by The Mathematics Education for the Future Project an international philanthropic project founded in 1986 and dedicated to innovation in mathematics science computer and statistics education Anchored in Place Leslie Bank,Nico Cloete,2018-11-05 Tensions in South African universities have traditionally centred around equity particularly access and affordability historical legacies such as apartheid and colonialism and the shape and structure of the higher education system What has not received sufficient attention is the contribution of the university to place based development This volume is the first in South Africa to engage seriously with the place based developmental role of universities In the international literature and policy there has been an increasing integration of the university with place based development especially in cities This volume weighs in on the debate by drawing attention to the place based roles and agency of South African universities in their local towns and cities It acknowledges that universities were given specific development roles in regions homelands and towns under apartheid and comments on why sub national place based development has not been a key theme in post apartheid higher education planning Given the developmental crisis in the country universities could be expected to play a more constructive and meaningful role in the development of their own precincts cities and regions But what should that role be Is there evidence that this is already occurring in South Africa despite the lack of a national policy framework What plans and programmes are in place and what is needed to expand the development agency of universities at the local level Who and what might be involved Where should the focus lie and who might benefit most and why Is there a need perhaps to approach the challenges of college towns secondary cities and metropolitan centers differently This book poses some of these questions as it considers the experiences of a number of South African universities including Wits Pretoria Nelson Mandela University and especially Fort Hare as one of its post centenary challenges Object Medleys Daisy Pillay,Kathleen Pithouse-Morgan,Inbanathan Naicker,2017-11-13 How do we get at the meanings of everyday and not so everyday objects and how might these meanings enrich educational research The study of objects is well established in fields such as archaeology art history communications fine arts museum studies and sociology but is still developing in education Object Medleys Interpretive Possibilities for Educational Research brings together 37 educational researchers from wide ranging contexts and multiple knowledge fields to a dialogic space in which subjects and objects living and nonliving entangle as medleys to open up understandings of connections made with between and through objects Object Medleys offers diverse innovative modes and lenses for representing interpreting and theorising

object studies The book is distinctive within scholarship on object inquiry in that much of the research has been conducted within Southern African educational contexts This is complemented by contributions from scholars based in Canada and the United Kingdom The original research represented in each peer reviewed chapter expands academic conversations about what counts as data and analysis in educational research Overall Object Medleys illuminates the applied and theoretical usefulness of objects in response to pressing educational and societal questions Object Medleys is a rich and fascinating exploration of new possibilities with potential for research teaching and learning that seems almost unlimited This book is a rich assembly of affordances for exploring and widening the role of objects in educational research It relocates attention from language and text towards embodied and material storytelling practices where new and marginalised ways of expression can find their ways into classrooms thereby opening completely new avenues of teaching and learning Kenneth M Ibjerg J rgensen Professor Aalborg University Denmark In a time when materiality is being brought at the centre of critical inquiry in the social sciences and humanities this edited collection offers unique insights into the relationship between objects subjectivities and learning Beautifully written and cogently argued the book breaks new ground by casting a critical spotlight on artefacts that might appear mundane at first sight but on closer inspection reveal complex patterns of educational potential Tommaso M Milani Associate Professor University of the Witwatersrand Johannesburg South Africa *Inclusive Education in South African Further and Higher Education* Tsediso Michael Makoelle, Cina P. Mosito, 2025-05-26 A historical overview of the evolution of inclusive education alongside the emergence of concepts such as of equity and access highlighting how these ideas have evolved been enacted and practiced in the higher education institutions HEIs of South Africa since 2001 **Proceedings of the 20th European Conference on Management, Leadership and Governance** Mafalda Patuleia, 2024
