Mauboussin, 2009 Leaders in business medicine law and government make crucial decisions every day The harsh truth is that they mismanage many of those choices even though they have the right intentions Why is it so hard to make sound decisions Mauboussin offers powerful rules for avoiding error Think Twice, 2010

The Arc of Awareness Joe Mutizwa, 2014-08-18 The Arc of Awareness explores and captures the essence of a leaders journey of expanding awareness This book is intended as a guide for students of business leadership in tertiary institutions as well as for practicing leaders in business who want to expand their appreciation of the key issues that confront leaders as they grow and develop The books main thesis developed through a series of questions on awareness is that by asking themselves these questions leaders expand their horizons and gain a deeper understanding that enables them to make a contribution towards the creation of humane communities within their organizations and to engage wider societal issues so as to contribute towards the building of humane societies

Behavioral Economics in Healthcare Ahmet Yildırım, 2024-11-25 Examining the roots of decisional errors stemming from biases shortcuts and reliance on incentives Y ld r m offers a deeper understanding of the influences on modern healthcare decisions and provides an avenue to guide the design of a more effective healthcare system which fosters improved mutual understanding among stakeholders Cognitive Investing Rich Willis, 2011-03-03 Investors ask the wrong questions Will the stock market rise or fall in the next month What is the best place to put my money right now Will interest rates rise or fall Will the economy improve or get worse What will be the best performing stock during the next year The problem with all of these questions is that the answers are unknowable and will always be so Dwelling on the unknowable is a fruitless quest that will not bring investors any closer to achieving long term financial goals Our fundamental problem is that we are using the wrong part of the brain Cognitive Investing explains how to make investment decisions using the portion of the brain better suited for the task and answers the questions investors should be asking What is the relationship between the economy and the stock market What is the difference between investing and gambling Why is selling much more difficult than buying How important is diversification Why do natural psychological urges lead us to make poor investing decisions Understanding the answers to these and many more essential questions will profoundly and fundamentally transform the way you approach investing

Left Brain, Right Stuff Phil Rosenzweig, 2014-01-07 Left Brain Right Stuff takes up where other books about decision making leave off For many routine choices from shopping to investing we can make good decisions simply by avoiding common errors such as searching only for confirming information or avoiding the hindsight bias But as Phil Rosenzweig shows for many of the most important more complex situations we face in business sports politics and more a different way of thinking is required Leaders must possess the ability to shape opinions inspire followers manage risk and outmaneuver and outperform rivals Making winning decisions calls for a combination of skills clear analysis and calculation left brain as well as the willingness to push boundaries and take

bold action right stuff Of course leaders need to understand the dynamics of competition to anticipate rival moves to draw on the power of statistical analysis and to be aware of common decision errors all features of left brain thinking But to achieve the unprecedented in real world situations much more is needed Leaders also need the right stuff In business they have to devise plans and inspire followers for successful execution in politics they must mobilize popular support for a chosen program in the military commanders need to commit to a battle strategy and lead their troops and in start ups entrepreneurs must manage risk when success is uncertain In every case success calls for action as well as analysis and for courage as well as calculation Always entertaining often surprising and immensely practical Left Brain Right Stuff draws on a wealth of examples in order to propose a new paradigm for decision making in synch with the way we have to operate in the real world Rosenzweig s smart and perceptive analysis of research provides fresh and often surprising insights on topics such as confidence and overconfidence the uses and limits of decision models the illusion of control expert performance and deliberate practice competitive bidding and new venture management and the true nature of leadership **Greece's**

'odious' Debt Jason Manolopoulos,2011 Jason Manolopoulos lends a unique perspective based on experience of the global financial system emerging markets and crises European politics and Greek society to demonstrate how one of the EU s smaller countries played a catalytic role in a crisis that threatens the future of the euro and possibly even of the European Union itself He digs beneath the headline economic data to explore the historical legacy and psychological biases that have shaped an ongoing political drama in a book that has profound implications for our understanding of economics as well as the policy choices for Europe s elite For more information please visit the book website <http://greecesodiousdebt.anthempresblog.com>

from model multi asset class portfolios Langlois and Lussier show how to implement performance drivers like institutional investors with access to extensive resources as well as nonprofessional investors who are constrained to small scale transactions There are few investment products whether traditional or alternative discretionary or systematic fundamental or quantitative whose performance cannot be analyzed through this framework Langlois and Lussier illuminate the structure of financial markets and the mechanics of sustainable investing so any investor can become a rational player from the nonprofessional investor with a basic knowledge of statistics all the way to seasoned investment professionals wishing to challenge their understanding of the asset management industry Snapshots of the Mind Gary A.
