Honor Related Violence Robert Ermers, 2018-02-02 Honor related violence is generally associated with crimes committed by people from the Middle East and adjacent areas Perpetrators sometimes justify their deeds saying they had to restore their honor Theorists have argued that men from these populations exclusively correlate honor with the behaviour of their womenfolk which they use as a pretext to further oppress and dominate women Due to large scale migration western societies have become acquainted with honor related violence and honor killings In this book Robert Ermers addresses a number of questions related to honor related violence including the use of predominantly

negative frames regarding the cultural and social background of non westerners and immigrants In many publications including the press crimes committed by non western individuals are often attributed to their cultural background rather than specific contexts or circumstances in contrast to western cases Vague and insufficiently defined concepts such as honor and culture strongly contribute to this bias Honor Related Violence deals with honor and honor related violence their background and contexts what honor is and what it is not It examines stigma in relation to honor and based upon stigma research reliably explains analyses and predicts honor related violence The book argues that people all over the world can be stigmatized excluded and ostracized when they commit misbehavior and therefore find themselves in a state of dishonor which can lead to honor related violence A timely intervention into the psychology of honor related violence this is an essential resource for students and researchers in the fields of social psychology sociology law criminology and anthropology
