create an astronomical timeline recording catastrophic events in the past as well as warning later generations of the precise times of future catastrophes They reveal how the Old Kingdom pyramids of Giza were created not as tombs for the pharaohs and their queens but as recovery vaults to ensure the rebirth of the Kingdom of Egypt after a global disaster by acting as storehouses for ancient Egyptian culture its tools seeds art and sacred texts Through the use of photos maps and diagrams of the Giza plateau the authors explain in detail how the angles and geometry of the Great Pyramid align with the stars of Orion's Belt to encode an important message that changes in the tilt of the world's axis have occurred in the remote past most recently in 3980 BCE and will occur again in the near future Highlighting the ubiquitous appearance of 23.5 degree angles the most important of the precessional angles encoded in the Giza pyramids in classic works of art including the work of Leonardo da Vinci and portraits of John the Baptist and George Washington the authors reveal how this angle the Great Pyramid and its fateful message are tied to Freemasonry and other secret societies Concluding with the remarkable revelation triggered by the myth of Osiris that there may be an as yet undiscovered 14th recovery vault on the Giza plateau Creighton and Osborn show that the prophecy of Giza is a message of first importance to our own civilization

Theaters of Conversion Samuel Y. Edgerton, 2001 Mexico's churches and conventos display a unique blend of European and native styles Missionary Mendicant friars arrived in New Spain shortly after Cortes's conquest of the Aztec empire in 1521 and immediately related their own European architectural and visual arts styles to the tastes and expectations of native Indians Right from the beginning the friars conceived of conventos as a special architectural theater in which to carry out their proselytizing Over four hundred conventos were established in Mexico between 1526 and 1600 and more still in New Mexico in the century following all built and decorated by native Indian artisans who became masters of European techniques and styles even as they added their own influence The author argues that these magnificent sixteenth and seventeenth century structures are as much part of the artistic patrimony of American Indians as their pre-Conquest temples pyramids and kivas Mexican Indians in fact adapted European motifs to their own pictorial traditions and thus made a unique contribution to the worldwide spread of the Italian Renaissance The author brings a wealth of knowledge of medieval and Renaissance European history philosophy theology art and architecture to bear on colonial Mexico at the same time as he focuses on indigenous contributions to the colonial enterprise This ground-breaking study enriches our understanding of the colonial process and the reciprocal relationship between European friars and native artisans
