Kaserman,Rigmar Osterkamp,2013-01-09 Although organ transplants provide the best and often the only effective therapy for many otherwise fatal conditions the great benefits of transplantation go largely unrealized because of failures in the organ acquisition process In the United States for instance more than 10 000 people die every year either awaiting transplantation or as a result of deteriorating health exacerbated by the shortage of organs Issues pertaining to organ donation and transplantation represent perhaps the most complex and morally controversial medical dilemmas aside from abortion and euthanasia However these quandaries are not unsolvable This book proposes compensating organ donors within a publicly controlled monopsony This proposal is quite similar to current practice in Spain where compensation for cadaveric donation now occurs in secret as this text reveals To build their recommendations the authors provide a medical history of transplantation a history of the development of national laws and waiting lists a careful examination of the social costs and benefits of transplantation a discussion of the causes of organ shortages an evaluation of partial reforms tried or proposed an extensive ethical evaluation of the current system and its competitors **Foreign operations, export financing, and related programs appropriations for 1989** United States.
