Thinking Like A Plant A Living Science For Life:

Thinking Like a Plant Craig Holdrege, 2013-10-15 Who would imagine that plants can become master teachers of a radical new way of seeing and interacting with the world Plants are dynamic and resilient living in intimate connection with their environment This book presents an organic way of knowing modeled after the way plants live When we slow down turn our attention to plants study them carefully and consciously internalize the way they live a transformation begins Our thinking becomes more fluid and dynamic we realize how we are embedded in the world we become sensitive and responsive to the contexts we meet and we learn to thrive within a changing world These are the qualities our culture needs in order to develop a more sustainable life supporting relation to our environment While it is easy to talk about new paradigms and to critique our current state of affairs it is not so easy to move beyond the status quo That s why this book is crafted as a practical guide to developing a life infused way of interacting with the world

Right Research Geoffrey Rockwell, Oliver Rossier, Chelsea Miya, 2021-04-29 The book is current and interdisciplinary engaging with recent developments around this topic and including perspectives from sciences arts and humanities It will be a welcome contribution to studies of the Anthropocene as well as studies of research methods and practices Sam Mickey University of S Francisco Educational institutions play an instrumental role in social and political change and are responsible for the environmental and social ethics of their institutional practices The essays in this volume critically examine scholarly research practices in the age of the Anthropocene and ask what accountability educators and researchers have in righting their relationship to the environment The volume further calls attention to the geographical financial legal and political barriers that might limit scholarly dialogue by excluding researchers from participating in traditional modes of scholarly conversation As such Right Research is a bold invitation to the academic community to rigorous self reflection on what their research looks like how it is conducted and how it might be developed so as to increase accessibility and sustainability and decrease carbon footprint The volume follows a three part structure that bridges conceptual and practical concerns the first section challenges our assumptions about how sustainability is defined measured and practiced the second section showcases artist researchers whose work engages with the impact of humans on our environment while the third section investigates how academic spaces can model eco conscious behaviour This timely volume responds to an increased demand for environmentally sustainable research and is outstanding not only in its interdisciplinarity but its embrace of non traditional formats spanning academic articles creative acts personal reflections and dialogues Right Research will be a valuable resource for educators and researchers interested in developing and hybridizing their scholarly communication formats in the face of the current climate crisis

Holonomics Simon Robinson, 2014-05-22 Businesses around the world are facing rapidly changing economic and social situations Business leaders and managers must be ready to respond and adapt in new innovative ways The authors of this groundbreaking book argue that business people must adopt a holonomic way of thinking a dynamic and

authentic understanding of the relationships within a business system and an appreciation of the whole Complexity and chaos are not to be feared but rather are the foundation of successful business structures and economic Holonomi presents a new world view where economic and ecology are in harmony Using real world case studies and practical exercises the authors guide the reader in a new holistic approach to business towards a more sustainable future where both people and planet matter This Sacred Life Norman Wirzba, 2021-10-14 This Sacred Life redescribes the meaning of this world and the value and purpose of human life within it The Business of Botanicals Ann Armbrrecht, 2021-02-25 From tulsi to turmeric echinacea to elderberry medicinal herbs are big business but do they deliver on their healing promise to those who consume them those who provide them and the natural world An eye opener Armbrrecht challenges ideas of what medicine can be and how business practices can corrupt and expand our notions of plant based healing The Boston Globe So deeply honest sincere heartfelt questioning and brilliant The Business of Botanicals is an amazing book that plunges in and takes a deepening look at those places where people don't often venture Rosemary Gladstar author of Rosemary Gladstar's Medicinal Herbs For those who loved Braiding Sweetgrass this book is a perfect opportunity to go deeper into understanding the complex and co-evolutionary journey of plants and people Angela McElwee former president and CEO of Gaia Herbs Using herbal medicines to heal the body is an ancient practice but in the twenty first century it is also a worldwide industry Yet most consumers know very little about where those herbs come from and how they are processed into the many products that fill store shelves In The Business of Botanicals author Ann Armbrrecht follows their journey from seed to shelf revealing the inner workings of a complicated industry and raises questions about the ethical and ecological issues of mass production of medicines derived from these healing plants many of which are imperiled in the wild This is the first book to explore the interconnected web of the global herb industry and its many stakeholders and is an invaluable resource for conscious consumers who want to better understand the social and environmental impacts of the products they buy Armbrrecht masterfully manages the challenges and complexity of her source material She is a spirited storyteller and presents all this with the skill of an anthropologist and the heart of an herbalist Journal of the American Herbalists Guild **Figurations of Peripheries Through Arts and Visual Studies** Maiju Loukola, Mari Mäkiranta, Jonna Tolonen, 2023-12-01 This edited volume breaks new ground for understanding peripheries and peripherality by providing a multidisciplinary cross exposure through a collection of chapters and visual essays by researchers and artists The book is a collection of approaches from several disciplines where the spatial conceptual and theoretical hierarchies and biased assumptions of peripheries are challenged Chapters provide a diverse collection of viewpoints analyses and provocations on peripherality through bringing together international specialists to discuss the socio-political aesthetic artistic ethical and legal implications of peripheral approach The aim is to illuminate the existing hidden often incommensurable and controversial margins in the society at large from equal ethical and empathic perspectives The book is designed to assist established researchers academics and

students across disciplines who wish to incorporate novel arts and practice based research and critical approaches in their research projects artwork and academic writing Providing both a consolidated understanding of the peripheries visual studies and artistic research as they are and setting expansive and new research insights and practices this book is essential reading for scholars of arts and humanities visual culture art history design philosophy and cultural studies Subtle Agroecologies Julia Wright, 2021-06-29 This book is about the invisible or subtle nature of food and farming and also about the nature of existence Everything that we know and do not know about the physical world has a subtle counterpart which has been scarcely considered in modernist farming practice and research If you think this book isn't for you if it appears more important to attend to the pressing physical challenges the world is facing before having the luxury of turning to such subtleties then think again For it could be precisely this worldview the one prioritises the physical material dimension of reality that helped get us into this situation in the first place Perhaps we need a different worldview to get us out This book makes a foundational contribution to the discipline of Subtle Agroecologies a nexus of indigenous epistemologies multidisciplinary advances in wave based and ethereal studies and the science of sustainable agriculture Not a farming system in itself Subtle Agroecologies superimposes a non material dimension upon existing materially based agroecological farming systems Bringing together 43 authors from 12 countries and five continents from the natural and social sciences as well as the arts and humanities this multi contributed book introduces the discipline explaining its relevance and potential contribution to the field of Agroecology Research into Subtle Agroecologies may be described as the systematic study of the nature of the invisible world as it relates to the practice of agriculture and to do this through adapting and innovating with research methods in particular with those of a more embodied nature with the overall purpose of bringing and maintaining balance and harmony Such research is an open minded inquiry its grounding being the lived experiences of humans working on and with the land over several thousand years to the present By reclaiming and reinterpreting the perennial relationship between humans and nature the implications would revolutionise agriculture heralding a new wave of more sustainable farming techniques changing our whole relationship with nature to one of real collaboration rather than control and ultimately transforming ourselves Future Sacred Julie J. Morley, 2019-02-12 Reveals how our survival depends on embracing complexity consciousness and relating to nature and all life as sacred Rejects the survival of the fittest narrative in favor of sacred symbiosis creative cooperation interdependence and complex thinking Provides examples from complexity studies cultural history philosophy indigenous spirituality biomimicry and ecology to show how nature's intelligence and creativity abound everywhere Documents how indigenous cultures lived in relative harmony with nature because they perceived themselves as part of the ordered whole of all life In Future Sacred Julie J Morley offers a new perspective on the human connection to the cosmos by unveiling the connected creativity and sacred intelligence of nature She rejects the survival of the fittest narrative the idea that survival requires strife and offers symbiosis and cooperation as nature's path

forward She shows how an increasingly complex world demands increasingly complex consciousness Our survival depends upon embracing complexity consciousness understanding ourselves as part of nature as well as relating to nature as sacred Morley begins by documenting how indigenous cultures lived in relative harmony with nature because they perceived themselves as part of the ordered whole of all life until modernity introduced dualistic thinking thus separating mind from matter and humans from nature The author deconstructs the fallacy behind social and neo Darwinism and the materialist theories of dead matter versus those that offer a connection with the sentient mind of nature She presents evidence from complexity studies cultural history philosophy indigenous spirituality biomimicry and ecology highlighting the idea that nature s intelligence and creativity abound everywhere from cells to cetaceans from hydrogen to humans from sunflowers to solar panels and that all sentient beings contribute to the evolution of life as a whole working together in sacred symbiosis Morley concludes that our sacred future depends on compassionately understanding and integrating multiple intelligences seeing relationships and interdependence as fundamental and sacred as well as honoring the experiences of all sentient beings Instead of mastery over nature we must shift toward synergy with nature and with each other as diverse expressions of nature s creativity

First Steps to Seeing Emma Kidd,2015-06-18 In the twenty first century we are confronted with a rapidly changing world full of social economic and environmental uncertainties We are all inherently connected to this changing world and in order to create the best possible conditions for life to thrive we must each develop an inner capacity to respond and adapt to life in new creative and innovative ways The author of this visionary book argues that the path to a happy healthy and peaceful world begins with the individual By learning to recognise our cognitive habits of interrupting and defining life through our fixed ideas labels and judgements we can begin to develop a dynamic way of seeing that enables us to perceive and respond to life with greater attentiveness First Steps in Seeing reveals a practical set of stepping stones that guide the reader into this dynamic way of seeing and relating Using personal stories practical exercises and real world case studies in development education and business the author takes the reader on a journey to explore how to give our full attention to life and how to enliven the world that we each co create An inspiring guide for all those working for social change in youth work business education or research or simply seeking fresh paths in life

The Figure of Christ in the Long Nineteenth Century Elizabeth Ludlow,2020-07-17 This book is an interdisciplinary collection of essays that explores the variety of ways in which the interface between understanding the figure of Christ the place of the cross and the contours of lived experience was articulated through the long nineteenth century Collectively the chapters respond to the theological turn in postmodern thought by asking vital questions about the way in which representations of Christ shape understandings of personhood and of the divine
