Thinking Through Translation:

Thinking Through Translation with Metaphors James St.Andre,2014 Thinking through Translation with Metaphors explores a wide range of metaphorical figures used to describe the translation process from Aristotle to the present Most practitioners and theorists of translation are familiar with a number of metaphors for translation such as the metaphor of the bridge following in another s footsteps performing a musical score changing clothes or painting a portrait yet relatively little attention has been paid to what these metaphorical models reveal about how we conceptualize translation Drawing on insights from recent developments in metaphor Thinking Through Translation Jeffrey M. Green,2010-09-01 Punctuated by thoughtful wit this engaging volume of essays offers Jeffrey M Green s personal and theoretical ruminations on the profession of translation Green begins many of the essays by relating the specific techniques and problems associated with translating from Hebrew texts From this intimate perspective he forges wise reflections on such subjects as identifying and preserving the writer s voice the cultural significance of translations and their contents the research and travel that are part of a translator s everyday life and the frequent puzzles associated with the craft Green combines a contemporary frankness about the financial practical theoretical and ethical aspects of translation with an aspiration to write like a good literary critic of the old school considering the moral and spiritual implications of the translation as well as its content Thinking Through Translation shows us with eloquent honesty that translation is a delicate art and skill and presents the trade as a way of attaining insight about history the world and oneself

Thinking Through Translation with Metaphors James St.Andre,2014-04-08 Thinking through Translation with Metaphors explores a wide range of metaphorical figures used to describe the translation process from Aristotle to the present Most practitioners and theorists of translation are familiar with a number of metaphors for translation such as the metaphor of the bridge following in another s footsteps performing a musical score changing clothes or painting a portrait yet relatively little attention has been paid to what these metaphorical models reveal about how we conceptualize translation Drawing on insights from recent developments in metaphor theory contributors to this volume reveal how central metaphorical language has been to translation studies at all periods of time and in various cultures Metaphors have played a key role in shaping the way in which we understand translation determining what facets of the translation process are deemed to be important and therefore merit study and aiding in the training of successive generations of translators and theorists While some of the papers focus mainly on past metaphorical representations others discuss recent shifts in both metaphor and translation theory while others still propose innovative metaphors in a bid to transform translation studies The volume also includes an annotated bibliography of works centrally concerned with metaphors of translation

Thinking Through Translation Yaacov Jeffrey Green,2001 An expert translator explores and explains his art and craft Punctuated by thoughtful wit this engaging volume of essays offers Jeffrey M Green s personal and theoretical ruminations on the profession of translation Green begins many of the essays by relating

the specific techniques and problems associated with translating from Hebrew texts From this intimate perspective he forges wise reflections on such subjects as identifying and preserving the writer's voice the cultural significance of translations and their contents the research and travel that are part of a translator's everyday life and the frequent puzzles associated with the craft Green combines a contemporary frankness about the financial practical theoretical and ethical aspects of translation with an aspiration to write like a good literary critic of the old school considering the moral and spiritual implications of the translation as well as its content Thinking Through Translation show us with eloquent honesty that translation is a delicate art and skill and presents the trade as a way of attaining insight about history the world and oneself

Theatre Translation in Performance Silvia Bigliuzzi, Peter Kofler, Paola Ambrosi, 2013 This volume focuses on the highly debated topic of theatrical translation one brought on by a renewed interest in the idea of performance and translation as a cooperative effort on the part of the translator the director and the actors Exploring the role and function of the translator as co subject of the performance it addresses current issues concerning the role of the translator for the stage as opposed to the one for the editorial market within a multifarious cultural context The current debate has shown a growing tendency to downplay and challenge the notion of translational accuracy in favor of a recreational and post dramatic attitude underlying the role of the director and playwright instead This book discusses the delicate balance between translating and directing from an intercultural semiotic aesthetic and interlingual perspective taking a critical stance on approaches that belittle translation for the theatre or equate it to an editorial practice focused on literalness Chapters emphasize the idea of dramatic translation as a particular and extremely challenging type of performance while consistently exploring its various textual intertextual intertranslational contextual cultural and intercultural facets The notion of performance is applied to textual interpretation as performance interlingual versus intersemiotic performance and intercultural performance in the adaptation of translated texts for the stage providing a wide ranging discussion from an international group of contributors directors and translators

Translation as Metaphor Rainer Guldin, 2015-10-05 In today's ever changing climate of disintegration and recombination translation has become one of the essential metaphors if not the metaphor of our globalized world Translation and Metaphor is an attempt to draw a comprehensive map of these new overlapping theoretical territories and the many cross disciplinary movements they imply In five chapters this book examines The main metaphor theories developed in the West The way the notion of metaphor relates to the concept of translation Different theoretical perspectives on metaphors of translation in translation studies The main metaphors developed to describe translation in the West and in the East Spatial metaphors within translation studies cultural studies and postcolonial theory The use of the metaphor of translation across psychoanalysis anthropology and ethnography postcolonial theory history and literature sociology media and communication theory and medicine and genetics Comprehensive analysis of key metaphor theories revealing examples from a wide range of sources and a look towards future directions make this a must have book for students researchers

and translators working in the areas of translation and translation theory **Translating China as Cross-Identity**

Performance James St. André, 2018-05-31 James St André applies the perspective of cross identity performance to the translation of a wide variety of Chinese texts into English and French from the eighteenth to the twentieth centuries Drawing on scholarship in cultural studies queer studies and anthropology the author argues that many cross identity performance techniques including blackface passing drag mimicry and masquerade provide insights into the history of translation practice He makes a strong case for situating translation in its historical social and cultural milieu reading translated texts alongside a wide variety of other materials that helped shape the image of John Chinaman A reading of the life and works of George Psalmanazar whose cross identity performance as a native of Formosa enlivened early eighteenth century salons opens the volume and provides a bridge between the book's theoretical framework and its examination of Chinese European interactions The core of the book consists of a chronological series of cases each of which illustrates the use of a different type of cross identity performance to better understand translation practice St Andr provides close readings of early pseudotranslations including Marana's Turkish Spy 1691 and Goldsmith's Citizen of the World 1762 as well as adaptations of Hatchett's The Chinese Orphan 1741 and Voltaire's Orphelin de la Chine 1756 Later chapters explore Davis's translation of Sorrows of Han 1829 and genuine translations of nonfictional material mainly by employees of the East India Company The focus then shifts to oral aural aspects of early translation practice in the nineteenth century using the concept of mimicry to examine interactions between Pidgin English and translation in the popular press Finally the work of two early modern Chinese translators Gu Hongming and Lin Yutang is examined as masquerade Offering an original and innovative study of genres of writing that are traditionally examined in isolation St Andr's work provides a fascinating examination of the way three cultures interacted through the shifting encounters of fiction translation and nonfiction and in the process helped establish and shape the way Chinese were represented The book represents a major contribution to translation studies Chinese cultural studies postcolonial studies and gender criticism **Thinking Through the Skin** Sara Ahmed, Jackie

Stacey, 2003-09-02 This exciting collection of work from leading feminist scholars including Elspeth Probyn Penelope Deutscher and Chantal Nadeau engages with and extends the growing feminist literature on lived and imagined embodiment and argues for consideration of the skin as a site where bodies take form already written upon but open to endless re inscription Individual chapters consider such issues as the significance of piercing tattooing and tanning the assault of self harm upon the skin the relation between body painting and the land among the indigenous people of Australia and the cultural economy of fur in Canada Pierced mutilated and marked mortified and glorified scarred by disease and stretched and enveloping the skin of another in pregnancy skin is seen here as both a boundary and a point of connection the place where one touches and is touched by others both the most private of experiences and the most public marker of a raced sexed and national history Translation Theory and Development Studies Kobus Marais, 2014-07-16 This book aims to

provide a philosophical underpinning to translation and relate translation to development The second aim flows from the first section's argument that societies emerge out of amongst others complex translational interactions amongst individuals It will do so by conceptualising translation from a complexity and emergence point of view and relating this view on emergent semiotics to some of the most recent social research It will further fulfill its aims by providing empirical data from the South African context concerning the relationship between translation and development The book intends to be interdisciplinary in nature and to foster interdisciplinary research and dialogue by relating the newest trends in translation theory i e agency theory in the sociology of translation to development theory within sociology Data in the volume will be drawn from fields that have received very little if any attention in translation studies i e local economic development the knowledge economy and the informal economy

Ubiquitous Translation Piotr Blumczynski, 2016-06-23 In this book Piotr Blumczynski explores the central role of translation as a key epistemological concept as well as a hermeneutic ethical linguistic and interpersonal practice His argument is three fold 1 that translation provides a basis for genuine exciting serious innovative and meaningful exchange between various areas of the humanities through both a concept the WHAT and a method the HOW 2 that in doing so it questions and challenges many of the traditional boundaries and offers a transdisciplinary epistemological paradigm leading to a new understanding of quality and thus also meaning truth and knowledge and 3 that translational phenomena are studied by a broad range of disciplines in the humanities including philosophy theology linguistics and anthropology using various often seemingly unrelated concepts which nevertheless display a considerable degree of qualitative proximity The common thread running through all these convictions and binding them together is the insistence that translational phenomena are ubiquitous Because of its unconventional and innovative approach this book will be of interest to translation studies scholars looking to situate their research within a broader transdisciplinary model as well as to students of translation programs and practicing translators who seek a fuller understanding of why and how translation matters
