Ancient Skies, Ancient Trees ,2016-10-25 Photographer Beth Moon revisits the world s oldest trees in the darkest places on earth using color photography to capture vibrant nighttime skies Throughout much of the world night skies are growing increasingly brighter but the force that protects the remaining naturally dark sky unpolluted by artificial light is the same that saves its ancient trees isolation Staking out some of the world s last dark places photographer Beth Moon uses a digital camera to reveal constellations nebulae and the Milky Way in rich hues that are often too faint to be seen by the naked eye As in her acclaimed first volume Ancient Trees Portraits of Time these magnificent images encounter great
