World Prehistory A Brief Introduction:

World Prehistory Brian M. Fagan, Nadia Durrani, 2016-09-13 This popular introductory textbook provides an overview of more than 3 million years of human prehistory. Written in an accessible and jargon-free style, this engaging volume tells the story of humanity from our beginnings in tropical Africa up to the advent of the world's first urban civilizations. A truly global account, World Prehistory surveys the latest advances in the study of human origins and describes the great diaspora of modern humans in the millennia which followed as they settled Europe, Asia, and the Americas. Later chapters consider seminal milestones in prehistory: the origins of food production, the colonization of the offshore Pacific, and the development of the first more complex human societies based for the most part on agriculture and stock raising. Finally, Fagan and Durrani examine the prevailing theories regarding early state-organized societies and the often flamboyant, usually volatile pre-industrial civilizations which developed in the Old World and the Americas. Fully updated to reflect new research, controversies, and theoretical debates, this unique book continues to be an ideal resource for the beginner first approaching archaeology. Drawing on the experience of two established writers in the field, World Prehistory is a respected classic which acquaints students with the fascinations of human prehistory.
