Resources in Education, 1998 The Encounter of Chinese and Western Philosophies Benoît Vermander, 2023-09-05 Vermander revisits the encounter between Chinese and Western philosophy while unfolding questions about the way comparative philosophy is conducted today In the vulgate of intellectual history Western thought has constructed a substantialist view of reality that puts relations and processes into a subordinate position The same view explains for the primacy given to the autonomy of individual beings In contrast according to the same vulgate Chinese thought has been stressing the fluidity of all phenomena and forms of life to best adapt to their overarching patterns The critique of these representations is a preliminary for tackling the following question in today's context what style of cross cultural philosophical engagement should be imagined and fostered Cross cultural philosophical dialogue is indeed indispensable to the revival of philosophies that could be both local and genuinely dialogic The first two chapters focus upon the dominant model propounded by Western sinologists when it comes to comparing the Western philosophical tradition with the Chinese one The third chapter shifts to Chinese narratives about local comparative and global philosophies notably assessing its self positioning vis vis Western authors topics and concepts Chapter 4 offers a general reading of ancient Chinese classics alternative to the one that presently dominates the landscape described in Chapters 1 to 3 Chapter 5 harnesses the results and insights already gathered offering a blueprint as to the way to positively draw upon different philosophical traditions to engage common questions and pursue shared endeavors A last chapter presents four cases of ongoing transcultural philosophical dialogues and the promises they bear while the conclusion recapitulates the journey and opens further perspectives Once it develops outside pre formatted narratives the web shaped by our philosophies and wisdoms suggests the outlines of a world that we could inhabit together **Reimagining God and Resacralisation** Alexa

Blonner, 2019-05-14 This book shows that widespread resacralisation has been taking place which is producing new ways of perceiving God and the divine The last century has seen unmistakable changes in religious practices and the concept of spirituality right across the world There was a broad expectation for much of the twentieth century that religious worldviews would eventually succumb to the challenge of secularist materialism but this process of secularisation has yet to occur as predicted The book begins by contrasting theories of secularisation and resacralisation Throughout the book conceptual threads or new religious themes related to this resacralisation are discussed in terms of three main categories reimagining God's nature substance and location reimagining human value and purpose and reimagining modes of redemption Finally the book considers how these threads are moving in various different directions and what the religious future might hold This is a bold examination of contemporary spirituality that will appeal to academics and scholars of religious studies new religious movements and the sociology of religion **Learning about Religion in Public Schools** Florida State University.
