How (not) to train the brain Amir Raz, Sheida Rabipour, 2019-04-11

Brain training is all the rage. Commercial and clinical initiatives capitalize on trailblazing interdisciplinary research that spans domains such as education, psychological and brain science, cognitive remediation, and mental health. Promotional materials boast that we can learn to think and respond faster, focus better, and control our emotions. Companies and authors market techniques to boost memory, increase confidence, and overcome cognitive impairments. *How not to Train the Brain* examines the field of cognitive fitness and scrutinizes the scientific evidence in support of brain training techniques. With the potential to affect millions, this topic is important for scientists, practitioners, educators, and the general public. While many a consumer often marvels at this highly commercialized field, discerning fact from fad becomes a challenge given the abundance of products, publications, and contexts. Moreover, available products prey on the naivety of individuals unfamiliar with the nuanced field of neuroscience, advertising programs that lack scientific validation or presenting unfounded arguments. In this book, the authors review data from hundreds of articles and provide an overarching account of the field, separating scientific evidence from publicity myth and guiding readers through how they should and should not train the brain. They describe existing techniques, including those rooted in scientific research and survey methods that purport to yield measurable improvements. Intended for a wide audience, this book taps a timely topic by highlighting the most salient approaches to boosting brain function while identifying those that don't seem to work.

[UN Convention against Transnational Organized Crime](#) Andreas Schloenhardt, Francesco Calderoni, Joseph Lelliott, Bettina Weißer, 2023-06-15

This book offers a comprehensive article by article legal commentary on the United Nations Convention Against Transnational Organized Crime and its Protocols on trafficking in persons, smuggling of migrants, and trafficking in firearms and ammunition. The Convention, often referred to by the acronym UNTOC, was approved by the UN General Assembly on 15 November 2000 and made available for governments to sign at a high level conference in Palermo, the heartland of the Italian Mafia, on 12-15 December 2000. For this reason, UNTOC is sometimes also referred to as the Palermo Convention. The Convention entered into force on 29 September 2003. The purpose of UNTOC is to promote cooperation to prevent and combat transnational organized crime more effectively. UNTOC seeks to promote consistency among national legal systems and set standards for domestic laws so that States parties can effectively combat transnational organized crime. UNTOC is supplemented by three protocols: the Protocol against the Smuggling of Migrants by Land, Air, and Sea; the Protocol to Prevent, Suppress, and Punish Trafficking in Persons, especially Women and Children; and the Protocol against the Illicit Manufacturing of and Trafficking in Firearms, their Parts, and Components and Ammunition. Article by article, this book presents the text of each provision of the Convention and the Protocols, followed by a systematic analysis of their background and negotiating history.
