The Burning Answer Keith Barnham, 2015-05-15 Our society faces a choice We could be enjoying a sustainable lifestyle but we have chosen not to In three generations we have consumed half the oil produced by photosynthesis over eight million generations In two generations we have used half our uranium resources With threats from global warming oil depletion and nuclear disaster we are running out of options Solar power as Keith Barnham says is our necessary solution Barnham explains that the roots of solar energy lie in a little known equation $E = hf$ an equation which was coincidentally celebrated and explained to the world by Einstein in the same year he discovered $E = mc^2$ He alleges that the former equation has been overlooked in favor of the latter much to our detriment and Barnham is here to offer us a solution We can still turn things around and solar

energy is the key In this provocative inspiring passionately argued book Keith Barnham outlines actions that any one and all of us can take to make an impact now and on future generations The Burning Answer is a solar manifesto for the new climate aware generation and a must read for climate change skeptics **Physics Trends** Chris Cooper, 2024-12-06 Today's fast moving world of science will have far reaching effects on all of our lives Trends in Science is a series of essential readings for anyone who wants to know more about how his or her future will be affected as well the series provides accessible and stimulating material for high school and college students for researchers and librarians All titles in the series provide an introductory overview of the field in the last 100 years reviewing the past but also predicting the new developments of the future a detailed chronology of the most important milestones an index of key terms and concepts biographies of the most important scientists in each field and their role in shaping their particular branch of science a listing of important Websites a directory of organizations and suggestions for further reading
