Vicodin Cats Manual Guide:

The Dental Reference Manual Geraldine M. Weinstein, Mitchell T. Zientz, 2016-11-29 This book is designed to meet the needs of both dental students and dentists by providing succinct and quickly retrievable answers to common dental questions. Students will find both that it clearly presents the particulars which should be familiar to every dentist and that it enables them to see the big picture and contextualize information introduced to them in the future. Practicing dentists on the other hand will employ the book as a daily reference to source information on important topics, materials, techniques, and conditions. The book is neither discipline nor specialty specific. The first part is wide ranging and covers the essentials of dental practice while the second part addresses individual specialties and the third is devoted to emergency dental treatment. Whether as a handy resource in the student's backpack or as a readily available tool on the office desk, this reference manual fills an important gap in the dental literature.

Manual of Clinical Procedures in Dogs, Cats, Rabbits, and Rodents Steven E. Crow, Sally O. Walshaw, Jennifer Boyle, 2011-11-16 Manual of Clinical Procedures in Dogs, Cats, Rabbits, and Rodents is the third edition of this esteemed veterinary medicine classic. The Third Edition offers readers expanded coverage of small exotic mammals such as gerbils, hamsters, and guinea pigs alongside a thorough revision of the common procedures for dogs, cats, and rabbits. Organized in the same user-friendly format of earlier editions, the Manual is an essential purchase for small and exotic animal veterinarians and veterinary technicians.

Handbook of Poisoning in Dogs and Cats Alexander Campbell, Michael Chapman, 2008-04-30 This handbook will help veterinary clinicians and their staff to manage cases of poisoning in dogs and cats. It will also help answer enquiries about potential poisonings received from concerned pet owners. The content has been compiled from over 15,000 past cases referred to the Veterinary Poisons Information Service, a 24-hour information service for veterinary surgeons. The VPIS experience is compared and contrasted with case data and reports from the literature to provide a comprehensive overview of both toxicity and management for the agents included. Each agent or group of agents has a separate chapter covering its effects in either the cat or the dog. In some cases, the species information is combined where the clinical effects and management are identical. The chapters provide all the information necessary for the immediate management of a particular poisoning case. This includes doses at which clinical intervention is advisable and dosing regimens and indications for any drug therapy required. Thus, the user will be able to access quickly all the information needed for an emergency situation without having to refer to other sources.
